

## Attendance schedule:

## Certificate II in Desktop Publishing C2-2G34 Session 1

Tuesdays 13 00 to 16 30 Room F26

Week/ Date	Competency	Topics
<i>*Start here to undertake program in Digital Imaging</i>		
1	PRIN103 Scan line image PRIN104 Digitise images for reproduction GRPH200 Edit a digital image	Units outline, assessment items, traditional print terminology, print media processes and specifications. Photoshop tools and menus, introduction to electronic retouching
2	As above	Digital imaging overview, electronic terminology, types of image capture devices, scanner types and controls, technical requirements, formula, resolution, file size, image size, resizing. New files, copying pasting, layer basics
3	As above	Scanning overview/familiarization, scan options & specifications, colour modes, resolution, file size. Scan <b>Line art</b> and <b>Greyscale art</b> to technical specifications. Selection techniques Practical exercises
4	As above	Image enhancement, first and last print tone selection, gradation, aesthetics. Optimise <b>line art</b> and <b>Greyscale art</b> . Editing selections Practical exercises
5	As above	Special effects; rescreening, duotone, posterisation and filters. Paths Practical exercises
6	As above	Colour theory, scan <b>Colour reflection and transmission (negative and positive) art</b> to specs, colour terminology, grey balance, casts, colour corrections, compare effects of image manipulations on final quality. Practical assessment exercise 1
7		<b>In class diagnostic theory quiz and revision</b> <b>Practical assessment exercise</b>
8	GRPH197 Capture a digital image	Introduction to assignment 2 Comparison of digital to conventional cameras Advantages disadvantages Practical exercises
9	As above	Digital media terminology, resolution requirements for different media Practical exercises
10	As above	Evaluation of image quality Image enhancement techniques Practical exercises
<i>*Exit here with Training Program in Digital Imaging</i>		
11	COMM169 Communicate in the workplace PRIN113 Inspect quality against required standards OHSS428 Maintain a safe work environment COMP144 Access and use the Internet	Introduction to assignments 3 to 5 Assessed in the structure and terminology used in Assignments Introduction to Assignment (to assess theoretical component) Structured workplace project to assess practical skills Introduction to Assignment (to assess theoretical component) Structured workplace project to assess practical skills Assignment (to assess theoretical component) Practical component assessed in the research methodology used for assignment work.
12	PRIN107 Output images	Introduction to assignment 6 Type and application of output devices Calibration procedures. Systems procedures and file management
13	As above	File types and PDF Evaluation and interpretation of results
14	As above	Practical project work
15	As above	Assignment 3 to 6 due
16	Work experience/project work PRIN288 Print intro validation	
17	Work experience/project work PRIN290 Prepress intro validation	
18	Workplace experience reports Resubmits assignments Revision Course review Feedback
