IMPACT					
	1	2	3	4	5
	Insignificant	Minor	Moderate	Major	Catastrophic
Project Contingency	Nil impact on contingency	<20% of contingency will be impacted	20% to <50% of contingency will be impacted	50% to 80% of contingency will be impacted	>80% of contingency will be impacted
Project Schedule	- Schedule is on track - Baseline established - Baseline approved by steering group	- Schedule +<5 working days and/or - has been baselined - baseline approved	- Schedule +5 working days and/or - has been baselined - baseline not approved	-Schedule +<10 working days and/or - has not been baselined	-schedule impact >10 working days and/or - Baseline not established nor approved - Has missed deliverables impacting critical path
Project Scope	- Nil impact - scope documented and approved	- Small impact – can be managed within current variables such as schedule and cost. - Scope documented and approved	- Medium impact – can be managed in current schedule and /or contingencies - Scope documented but not approved	10% to <20% High impact – will result in changes to project cost, time or quality.	- Significant impact – will result in changes to project cost, time or quality. - Scope not defined or approved - scope changes implemented but not documented or approved
Project Benefits	Insignificant benefit impact.	<5% Small impact – benefit decrease.	5% - <10% Medium impact – benefit decrease.	10% - <20% High impact – benefit decrease.	>20% Significant impact – benefit decrease.
Project Dependencies	No impact.	- Future phase cannot commence without satisfying - manageable impact on critical path	- Next Phase cannot commence until satisfied - Will moderately delay critical Path	- Current Phase cannot complete until satisfied - Will majorly delay critical Path	- Project cannot continue until satisfied - Will significantly delay critical Path
Project Compliance	Nil impact on audit	- Nil impact on external audit - possible impact on internal audit	- Possibility of being flagged by External Audit - Will be detected by Internal Audit	- High Possibility of being flagged by External audit	- External audit findings will be raised

Strategic Compass

Program Dashboard Reporting Matrices

The Program Dashboard reporting matrices (Traffic light reporting system) have been developed based on the Risk Management Approach currently utilised by CIT.

It supports the assesment of a critical program/project management dimension (Risk, Issues, Dependencies and Compliance) against a key project metric (Contingency, Schedule, Scope, Benefits, Dependencies and compliance) to identify the current state of the program/project, in that particular area.

The impact scale has been developed across the agreed key Program/Project Metrics and scaled across five levels (Insignificant to Catastrophic). This impact scale will apply across all the project management dimensions below

For simplicity, an approach is proposed whereby if a project is flagged as red or amber in any of the dimensions, the entire project is flagged to the highest level of indicator present. For example if a project is found to have a single high (red) rating in risk, then the project is flagged as red in the risk reporting dashboard and further detail provided on the flagged risk and treatment strategy as an attachment.

Version 1 0 20/03/2017

Strategic Compass Program Office

Authority: Marcus Kanagasuntherie - Program Manager

RISK RATING MATRIX									
Likelihood Scale		Impact Scale						LIKELIHOOD SCALE	
		Insignificant	Minor	Moderate	Major	Catastrophic		Scale	Description
		High	High	High	High	High		Almost Certain	Is expected to occur Once a quarter; or >1 in 10
		Medium	High	High	High	High		Likely	Will probably occur Once a year or more; or 1 in 10 - 100
		Low	Medium	Medium	High	High		Possible	Might occur sometime in the future Once every 1 – 5 years; or 1 in 100-1000
		Low	Low	Medium	Medium	Medium		Unlikely	Could occur but doubtful Once every 5 – 20 years; or 1 in 1000 – 10,000
		Low	Low	Low	Low	Low		Rare	Occur only in exceptional circumstances Once every 20-100 years; or 1 in 10,000 – 100,000
Issues Matrix									
Urgency Scale		Impact Scale						Urgency Scale	
		Insignificant	Minor	Moderate	Major	Catastrophic			Requires resolution prior to:
		High	High	High	High	High		Current	Conclusion of current Fortnight
		Medium	High	High	High	High		Urgent	Current Phase Conclusion
		Low	Medium	Medium	High	High		Important	Next Phase commencement
		Low	Low	Medium	Medium	Medium		Timely	Next Phase Conclusion
		Low	Low	Low	Low	Low		As needed	Prior to end of project
Dependencies Matrix									
Dependency Management Scale		Impact Scale						Dependency Management Scale	
		Insignificant	Minor	Moderate	Major	Catastrophic			Requires resolution prior to:
		High	High	High	High	High		Not Mapped or Managed	No mapping has been conducted
		Medium	High	High	High	High		Minimal mapping done	Mapping has commenced but not finalised, not being monitored
		Low	Medium	Medium	High	High		Mapped not managed	Mapping has been done, but not assigned or being monitored
		Low	Low	Medium	Medium	Medium		Mapped and partially managed	Mapping completed, not fully assigned or being monitored
		Low	Low	Low	Low	Low		Mapped and Managed	All dependencies mapped and properly managed/monitored
Compliance Matrix - to be developed further with Business Support team									
Compliance Scale		Impact Scale						Compliance Scale	
		Insignificant	Minor	Moderate	Major	Catastrophic			Requires resolution prior to:
		High	High	High	High	High		Non Compliant	- Policies not followed at all - Checklists not completed - Documentation not stored in TRIM - Rectification not possible
		Medium	High	High	High	High		Partially Compliant	<30% - Policies followed - Checklists partially completed - Minimal documentation in TRIM - Partial rectification possible
		Low	Medium	Medium	High	High		Mostly Compliant	50 % - Policies followed - Checklists partially completed - Documentation partially in TRIM - will be rectified prior to completion of next phase
		Low	Low	Medium	Medium	Medium		Nearing Compliance	<80 % - Policies followed (immaterial omissions) - Checklists completed - Most documentation in TRIM - will be rectified by completion of current phase
		Low	Low	Low	Low	Low		Fully Compliant	- Policies fully followed (no omissions identified) - Checklists completed - All documentation stored in TRIM

CIT Compass Projects

Project	Project Approach	Allocated Budget (\$m)	Start Date	Finish Date	Project Manager	Project Sponsor	Steering Committee (Yes/No)	CEO Briefing (note date and specific approvals)	05/04/17 - Review	12/04/17 - Review	19/04/17 - Review	Objectives	Outcomes	Funding Case Stated Deliverables (as of July 2016)	Status Updates	Risk	Trim reference and electronic links
Product Innovation Fund	Draft (copy not provided)	\$0.20												1. Provide a platform to promote and encourage innovative ideas from teachers and staff for products and courses in new and established markets. 2. To assist CIT to adapt our offerings for the skills for the future and foster a broader understanding of the importance of CIT creating repeatable profitable and sustainable products and courses			
CIT Digitalisation Strategy	Yes	\$2 250 000.00	Jul-16	Dec-17	Sarah Dixon	Sue Maslen	Yes	29/03/2017				1. Understand the drivers of customer choice and the market segments 2. Understand and document the customer journey 3. Better equip staff to respond positively to improve the customer experience 4. Improve market share in an increasingly competitive market by increasing the active promoters of CIT	1. A clear understanding of current state and key drivers in customer choice 2. Recommendations for change to CIT governance structural and procedural arrangements to support an improved customer experience at CIT 3. A survey tool to provide the ability for systematic collection and reporting of customer feedback 4. A model for continuous measurement and improvement of customer satisfaction 5. Future state blueprint and roadmap	1. Develop more automated and streamlined processes 2. On-line enrollment system 3. A contemporary Learning Management System 4.A contemporary Client Relationship Management (CRM) system 5. Efficient and effective business processes		H	
CIT Customer Experience Journey	Yes	\$430 000.00	Jul-16	Dec-17	Sarah Dixon	Sue Maslen	Yes	29/03/2017				1. To create a 'smart campus' through the identification and implementation of digital technologies to help better engage customers and to increase productivity. 2. To transform its business processes and services through a CIT Service Improvement Team led by a CIT Director Digital Transformation (DDT) 3. Evaluate and make recommendations on whether key systems are fit for purpose. 4. Drive service improvement across CIT through the implementation of mobile-ready business process digitalisation software to streamline processes which have been identified as major pain points for customers and staff.	1. A customer centric CIT Digital Strategy and 3 year roadmap 2. Stream lined and automated business processes starting with enrolments 3. Systems that are fit for purpose integrated and support our customers and staff 4. A model for continuous improvement 5. Analytics to inform business decisions 6. Sufficient cost savings to fund Service Improvement team	1. To provide an exceptional customer experience for every customer interaction across CIT			
Innovative Learning Resource Project	Yes	\$625 000.00	Apr 167	Dec-17	J-Deon Esterby-Wood	Sue Maslen	Yes					1. To run an initial pilot of three small development projects to provide some baseline intelligence about the current development approach the fit for purpose of the current systems and the needs of the CIT learners. 2. To make evidence based decisions about the most effective model for learning resource development in CIT leading to an agreed model. 3. The establishment of an interim Central Resource Development Unit in 2017 to combine the expertise of existing CIT and CIT Solutions Instructional Design capability to trial evaluate and report on the effectiveness of the agreed model. Many different approaches will be considered as inputs and possible modes of operation prior to the consideration of the interim model for CIT's context. 4. As a result of the lessons learnt with the interim CRD Unit the establishment of the ongoing effective sustainable CIT CDR Unit to commence in January 2018. What the final unit may look like is dependant on the final model decided upon as a result of the operation of the interim unit.	1. Improved learning resources for the 3 pilot projects which will enable those Colleges to enrol students into programs with more contemporary learning resources which will result in (a) an increased student experience and (b) useful data regarding the benefits of the investment in the resources which will add to the evidence based decisions around the agreed future model. 2. An external report as a result of the build for the pilot projects outlining CIT's strengths challenges and opportunities in regards to learning resource development. The report will focus on relevant CIT systems technology capability and capacity and will add to the evidence based decisions around the agreed future model. 3. An agreed model developed by the interim CRD Unit to guide the development activities for 2017 which will result in a series of improved program learning resources and lessons learnt through that development to educate the final development model. 4. Evaluation of the interim unit to inform the establishment of the unit going forward. The establishment of the ongoing effective sustainable CIT CDR Unit to commence in January 2018 dependant on the outcome of the evaluation of the final model.	1. To centralise instructional designers resource developers and online experts within a designated unit to modernise resources to meet changing student and industry needs 2. To address the demand for more digital learning resources to increase opportunities for flexible innovative and online learning to occur. 3. To increase the quality and consistency of teaching and learning resources and position CIT to be able to more effectively operate in a contestable market.		H	
Evolve Together Project	No (Pending)	\$0.28												1. A cultural change program within CIT to meet emerging training needs.		H	
Centres of Excellence	No (Pending)															H	
Evolving Teacher Program	Yes	\$375 000.00	Sept 167	Dec-17	Denise Madden							1. Build a highly skilled contemporary teaching workforce able to increase CIT's market share in all VET market segments 2. Role model contemporary teaching practices 3. Begin the evolution of teachers from digital literacy to digital fluency 4. Develop strong skills in pedagogical approaches to enable teachers to deliver effectively in a broad range of settings including work based learning 5. Develop a strong client service culture within our teaching cohort 6. Increase enrolments and improve outcomes for students including employment outcomes 7. Equip teachers with the knowledge and skills required to be proficient in meeting the RTO standards 8. Establish a financially sustainable new approach to teacher development at CIT for the future.	1. A declaration of contemporary teaching practice by 30th June 2017 2. A capability framework approved by 30th June 2017 3. Teacher personas representing stages of teacher development described by 30th June 4. A suite of content targeted to persona needs trialled and evaluated by November 30th 5. An evidence based recommendation for a new model of professional development by November 30th that can be actioned under BAU	1. To develop a new approach to teacher development at CIT and equip teachers with contemporary pedagogic and program design skills to meet the changing expectations of modern learners (including their digital expectations). 2. To build a skilled contemporary teaching workforce able to increase CIT's market share in all VET market segments.		H	
Australian Apprenticeship Project	Yes	\$3 282 708.00	Jul-16		Kerry Weiss							The new Australian Apprenticeships Project from 2016-2017 will investigate evaluate and implement the key findings of the first project.	The ACT's public provider will operate effectively in an environment of greater competition.	1. Develop trial and implement an enhanced model for the delivery and administration of Australian Apprenticeships by the ACT Government's public provider (CIT) 2. To investigate system and policy changes that need to occur to enable standard compliance reporting and payment arrangements to apply to both public and private provider delivery of Australian Apprenticeships training in the ACT.		H	
Business Development and Industry Partnerships	No (Pending)	\$0.79														H	

Australian Apprenticeship Project Budget:		
Sub Total	\$	4,424,226.20
Subtract adjustments	\$	1,141,518.20
Total:	\$	3,282,708.00

## CIT EVOLVING TEACHER PROJECT RISK - 2018

No	RISK	SOURCE AND IMPACT	Risk rating before treatment	TREATMENT CONTROLS CURRENT	TREATMENT CONTROLS FUTURE	Risk rating after treatment	Risk Owner and completion date
1.	<i>Lack of maturity to undertake self-assessment</i>	<b>Source</b> Self-assessment tool, a key deliverable under Evolving Teacher.  <b>Impact</b> Delay in providing access to self-assessment tool.	<b>Likelihood</b>  <b>LIKELY</b>  <b>Consequence</b>  <b>LOW</b>		Further development required to identify the broader touch points of the Project, before self-assessment is appropriate.	<b>Likelihood</b>  <b>POSSIBLE</b>  <b>Consequence</b>  <b>LOW</b>	PROJECT MANAGER March – May  Ongoing

## Strategic Compass 2020 Projects

### Case studies

#### Evolving Teacher

##### Mentor Program

In 2018, Evolving Teacher (ET) piloted a CIT Peer Mentor Program that provided teaching staff with opportunities to develop their skills and capabilities as VET practitioners in a contemporary teaching and learning environment. The program built professional networks across CIT and offered expert professional development in mentoring skills for mentors, and ongoing support for mentors and mentees from the ET team.

Mentors generally reported that they gained significant value from the pilot through skills development in mentoring, leadership and giving feedback, and through reciprocal knowledge sharing with their mentee.

Mentors and mentees widely reported that this program should be mandatory for all new teachers and that one of the most beneficial mentoring activities was in class observation and associated feedback.

ET considered the 2018 program evaluation data and the CIT Strategic Compass 2020 imperatives, to design the 2019 Mentor Program considering the CIT board priority for leadership and business management development for middle management and Heads of Departments.

The 2019 program comprised of three Mentor cohorts, each with a different professional development focus. The cohorts comprise of Executives and Managers, as well as both Teaching & Learning and General staff. CIT Human Resources have co-funded the Mentor Program for General Staff; however, Evolving Teacher has taken responsibility for program management.

##### Program objectives

- To contribute to the CIT board priority for leadership and business management development for middle management and Heads of Departments
- Cultivate sustainable, collaborative networks across CIT
- Build advocacy to support Strategic Compass direction
- Strengthen leadership capacity and capability across CIT
- Support succession planning
- Exposure to successful business practices and activities across CIT
- Shared understanding about CIT systems, processes and protocols
- Develop teaching and learning skills and capability
- Develop mentoring skills and capability
- Offer a structured professional development opportunity for staff
- Transform our business by investing in our staff to attract and retain talented people for an energetic, innovative workplace and investing in our staff with exceptional professional development opportunities

### Current State

- Fifty-two staff building networks and developing curated skills including ED's, Directors, Heads of Department, Teachers and General staff
- Fifty-six CIT Leaders upskilled in coaching and mentoring

[REDACTED]

[REDACTED]

### A snap shot of other participant comments:

- [REDACTED]

### Digital Coach

Evolving Teacher Digital Fluency Coaching Pilot 2018 upskilled 25 trainers and assessors in digital skills relevant to work performed at CIT. The program aligns with and supports the Teacher Professional Learning Capability theme *Digital fluency*. The program is focussed on coaching and training in the Microsoft suite – Word, Power Point, Excel and Outlook – and will prepare the workforce with the implementation to Office 365.

In 2018, all respondents reported that they were doing things differently and saving time as a result of digital coaching. They reported a varied amount of time saved:

- Several minutes per document
- 30 minutes per day when developing resources
- When doing Word documents 1 hour per day
- 15 minutes per day
- Hard to tell yet, but the quality of documents produced has increased

### Snap shot of participant comments:

- [REDACTED]

### Return on Investment

- Wasting 10 minutes a day costs us around **\$2,818.16** a year per staff member
- For every 10 minutes we save across 479 teaching staff we can return **\$1,349,899.55** a year

More than 300 staff will be upskilled by the end of 2019.

The Digital Coaching 2019 program continues to upskill trainers and assessors in digital skills relevant to work and continues to address skill gaps and build capability.

Feedback has proven that 90% of formal feedback rates the training 10/10 for the quality, relevance and benefit.

120 individuals and 24 group training with teaching departments and an additional group workshops available to all CIT Staff across Fyshwick, Bruce, and Reid campuses.

Proven significant digital skills uplift - increases productivity as well as confidence in using digital technologies for creative and collaborative teaching and learning.

### Adobe Creative Cloud Training

More than 100 staff have attended and engaged in a variety of training workshops throughout 2018 & 2019 in Adobe Premiere Rush (Video training), Presenter, Spark Page / Video and Post and Adobe Acrobat Pro. All training supports digital confidence in using technologies for creative, immersive and collaborative teaching and learning. Collaboration with the Digitalisation project has informed the rolling out of communications and ubiquitous access to the Adobe Creative Cloud software suite.

### CIT Discovery Tours

In 2019, 131 staff have explored 17-hosted tours through CIT teaching and learning spaces, building networks and sharing pedagogical approaches.

Snap shot of participant comments:

A horizontal bar chart titled 'U.S. should take action to address climate change' showing the percentage of respondents who believe the U.S. should take action to address climate change. The chart is broken down by gender (Male, Female) and age group (18-29, 30-49, 50-69, 70+). The y-axis lists the demographic groups, and the x-axis shows the percentage from 0 to 100. The bars are colored blue for 'Yes' and red for 'No'.

Demographic	Yes (%)	No (%)
Male, 18-29	85	15
Male, 30-49	75	25
Male, 50-69	80	20
Male, 70+	70	30
Female, 18-29	85	15
Female, 30-49	80	20
Female, 50-69	75	25
Female, 70+	85	15

## Objective

- Evolving Teacher met and collaborated with the HCS College Director, Heads of Department and Subject Matter Experts (SME) as well as consistently updated all stakeholders through weekly project updates. Evolving Teacher led a small project team that included staff from ILR, Education Services and the SMEs. Important insights into learner cohorts, current resources, delivery and assessment methods and other relevant background to inform the design and development. Evolving Teacher engaged in face-to-face consultations with various staff and subsequent communications via phone and email. The project also collaborated with the eLearn team which subsequently informed improved pedagogical changes to the current eLearn Snap theme.

- Community
- Wellbeing and Fit & Well
- Human Services
- Children's Education & Care

## Product Innovation Fund (PIF)

The PIF process has enabled over 150 Canberra Institute of Technology (CIT) staff and key stakeholders (including students and industry) to work through a perceived challenge and address the challenge through a design process.

The process follows clear stages that have been applied into the innovation and entrepreneurship industry by Canberra Innovation Network [REDACTED] to enable small start-ups companies to construct agreements and find solutions that have been rigorously 'tested by customers' prior to undertaking a fast paced pitching process.

Human Centred Design process principles underpin the program and ensure a customer centric focus is undertaken in the design of the process or product.

Participants must be prepared to:

- Work collaboratively with CIT and external stakeholders.
- Test their own assumptions
- Challenge their perceptions of what works and what does not and why.
- Present in a short timeframe and accept feedback and 'pivot' their idea
- Prototype ideas, processes and products in a visual format and undertake group critiques of the work, then revisit the idea and repeat process.
- Understand the challenge from multiple stakeholder views and lenses.

At CIT this process has seen over 40 project ideas 'pitched' to panels since 2017. The following case studies demonstrate the internal stakeholder development and the progress made to take the product to the customer.

## CASE STUDY

### Project

- Real Time Rewind – Anywhere, Anytime, 2018, \$15,000

### Team members

### Brief description

- Recording of Practical Demonstrations and uploading for learners to access and review Anywhere, Anytime

### Outline of the challenge

The current situation for culinary students undertaking classes at Canberra Institute of Technology:

- There is an inability for students to review practical demonstrations in class due to the lack of video/audio recordings.

- There are compromised learning opportunities, as students could be late, distracted, missed the lessons or demonstrations. This affects the success of the student and impacts on the teacher as they repeat processes multiple times.
- To work out how to create practical demonstrations to be recorded live and uploaded (immediately after) for direct student access, allowing student to review anytime anywhere.

## Benefits

The project has encouraged and pushed the culinary team outside of their comfort zones and made them consider, think and review everything from a different perspective, this has been extremely motivating, scary and empowering going through the process and can only be seen as a benefit to CIT and learners.

The program encouraged teachers to engage in conversations with student services, technology companies, broader CIT divisions and colleges and student services.

The project will allow Culinary to provide an authentic learning experience for students and allows for different learning styles and speed of learning and the resources will be fit for purpose.

It will also allow CIT teachers to review and train through critical reflection, quality assurance and for teacher training.

## Prototype process

Through the prototype process stage for the PIF project the team were able to trial a recording, and loaded a practical demonstration for a class of 18.

- <https://youtu.be/teJscGm6rTk> Link provided to the students on the day that we completed the trial prior to the pitch

The customer validation captured the student's interaction with the subject material. Of the class of class of 18 there were 84 student interactions with the video.

- 16 accessed within the class time
- 21 further hits over the next 24 hours
- 32 hits during the next week
- Currently 84 views of the demonstration

## Collaboration

Ongoing work since winning a 'PIF grant', has seen the team exploring the technology and find a solution that meets the customers' requirements, whilst being flexible to the physical infrastructure of the campus. The team are working with the technical officer from Music Department (demonstrating cross college collaboration and knowledge sharing); this has identified the equipment needed and best way forward for the project. Without the support and expertise, that the Dylan has provided in the development stage the project would have struggled to get off the ground and this continues to be a great sounding board on the best practice and outcomes of the project to ensure it is implemented in 2019.

Piero, from Corporate Services has provided support and expertise seeking quotes and equipment options best suited to our project and continues to be a contact point for us and the project.

The conversations we continue to have with Dylan, Piero and other members of CIT allows us to review and tap into their knowledge, experience and expertise they have to improve our project and the student journey.

#### Broader benefits and collaboration

The CIT culinary team are an exemplar example of the PIF process to team development and 'shifting' a team to undertake innovation as a way of teaching and work.

Since 2018 the culinary team has enabled seven members to undertake the PIF process. This has activated their ability to pursue innovative concepts and opportunities for students and industry. Examples of these include:

- 2018 and 2019 ACT Health department healthier food competition. 22 CIT culinary students took part in these projects and one start-up company has commenced prototyping of product and [REDACTED]
- Four VET/ELP mobility program with [REDACTED], facilitating 40 students to undertake a cultural exchange.
- Two culinary students used the mobility program to launch their international work experience, one in Singapore and one in the USA.
- Food and agriculture project with [REDACTED]

## **AUDIT COMMITTEE**

### **MEETING No. 26**

#### **AGENDA ITEM No. 4.2**

### **Strategic Compass 2020 Projects – Evolving Together (For Noting)**

#### **Purpose**

To provide the Audit Committee (the Committee) with an update on the Strategic Compass 2020 Projects.

#### **Background**

The Committee has received an update on the Strategic Compass 2020 Projects – Evolving Together at each meeting since 2017. For 2019, the CIT Board requested that quarterly reports of the Board's Strategic Compass priorities and related actions be provided to the Board for monitoring. The June 2019 report is provided to the Committee for information at [Attachment A](#). The next quarterly report will be completed at the end of September 2019 for the Board's 16 October 2019 meeting.

#### **Issues**

##### **Campus Renewal Update**

CIT continues to work with the Chief Minister, Treasury and Economic Development Directorate to explore a potential new site for a CIT campus. An external contractor has been hired to undertake an analysis of potential Woden sites that may suit the needs of students, industry, the community and CIT.

CIT is confident that the contractor has a good understanding of the education and training landscape and appreciates the importance of CIT's connections to the broader ACT business and educational ecosystem. A government decision, about where a new CIT will be located, is expected by the end of 2019.

##### **CEO Priorities**

The CEO is continuing work with a group of nine CIT leaders (the Evolving Together Design Team) in gaining a much deeper understanding of contemporary organisational transformation including theories related to connectivity, complexity and networks and how these enable transformation. The Design Team is developing new knowledge in the application of tools associated with contemporary transformation including micro-narrative capture and network mapping. Reflecting contemporary transformation methods, an approach of safe to fail experiments are being conducted to facilitate learning and exploration of new ways of thinking and decision making. This work is aimed at enabling CIT to adapt and co evolve with the Canberra ecosystem and support CIT's sustainability into the future.

The CEO has also been working with a broad cross section of both teaching and non-teaching staff during dedicated Evolving Together briefings and also by attending staff meetings across all campuses. These informal gatherings are an important platform for staff to see and understand the connections between the work that is occurring across the nine projects, especially Evolving Together, and how this work is being integrated into business as usual. Feedback received from staff suggests their understanding of the change program has deepened because of these opportunities working directly with the CEO to explore ideas, test assumptions and ask questions in a non-traditional setting.

### **Transitioning to Business as Usual**

The Executive Team continues to work with Program Managers on integrating the work of the nine projects into business as usual. There is greater appreciation across the organisation that the success of the Strategic Compass 2020 is not just related to the outcomes of the nine projects and that staff must consider everything CIT does and how it relates to the four promises. Aligning the nine projects within business as usual will be finalised in preparation for the 2020 Budget.

Identifying opportunities to amplify other important work occurring across CIT, in parallel to the nine projects, associated with the four promises are also being explored in the coming months.

### **Mid-Term Review of Strategic Compass 2020 - Nous Report**

In line with the management action plan (MAP), CIT's Executive Management Committee (EMC) has implemented some changes in relation to project management governance and communication.

Streamlined governance mechanisms have been established with the discontinuation of the Evolving Together Advisory Committee (ETAG). Project governance will be managed through EMC with dedicated Strategic Compass 2020 project meetings occurring three times each year.

A renewed focus on communicating information available about the nine projects on the Staff Information System has also been established and information has been refreshed and simplified where appropriate.

### **Finance**

CIT's 2019 Budget includes further investment of \$5.6 million in the Strategic Compass Projects. A Financial Report on the Strategic Compass Projects, showing year to date (YTD) actual expenditure on the projects until end of July is provided at **Attachment B**.

### **Risks**

Risks associated with the Strategic Compass 2020 Projects continue to be managed through the CIT's Enterprise Risk Management Profile. There have been no new risks identified since the last Committee meeting.

### **Recommendation**

That the Committee notes the information provided in this paper.

Agenda Item	4.2
Agenda Title	Strategic Compass Projects –Update report
Outcome	Noting and Decision

### Purpose

To provide the Audit Committee with an update on the Strategic Compass 2020 and on the Board's Strategic Compass priorities and related actions for noting and to recommend that separate Strategic Compass Project reporting is no longer required in 2020.

### Background

The Committee has received an update on the Strategic Compass 2020 Projects – Evolving Together at each meeting since 2017. For 2019, the CIT Board requested that quarterly reports of the Board's Strategic Compass priorities and related actions be provided to the Board for monitoring. The September 2019 quarterly report was provided to the Board at its 16 October 2019 meeting and is provided to the Committee for information at **Attachment A**.

At the September 2019 Audit Committee meeting, members requested case studies outlining successes be provided at the next Audit Committee meeting as part of this report. At this meeting members also stated that they were going to review the Strategic Compass reporting requirements for 2020.

### Issues

#### Campus Renewal Update

CIT continues to work with the Chief Minister, Treasury and Economic Development Directorate to explore a potential new site for a CIT campus. The Government is in the process of deliberating on this matter and considering a Site Analysis Report and a Triple Bottom Line Report. A Government decision, about where a new CIT will be located, is expected by the end of 2019.

#### Evolving Together Learning Series

The Evolving Together Learning Series is continuing with sessions held in August and October involving over 130 staff attending each event. A further session is scheduled for the end of November 2019.

The Evolving Together learnings and tools will help CIT become more of a contemporary learning organisation by amplifying data and narratives that assist CIT meet the *Strategic Compass* four promises and dampening data and narratives not conducive to the desired culture. The desired cultural shift is described in the *CIT Futures* paper as moving from projection (where we plan forwards and prepare CIT for a single, present and seemingly inevitable future) to probabilities (where we take a risk-based approach and prepare CIT for a discrete number of potential futures) to possibilities (where we design contexts and prepare CIT to influence possible emergent futures).

### **Project Reporting and Transitioning to New Ways of Working**

As outlined in the previous report to the Committee, and to ensure financial sustainability going forward, the Executive Team continues to work with Project Managers and HR on integrating key elements of the projects and new ways of working into existing teams. Aligning priority work from the projects into existing areas is being finalised as part of the 2020 Budget.

Although the nine projects were identified as key priority areas in 2016, some have had greater longevity than others. For instance, we now know that Digitalisation will continue until at least 2021 due to additional budget funding and Campus Renewal is ongoing and will grow to incorporate building a new campus by 2023-24. Some other projects (Australian Apprenticeships and Evolving Teacher) will transition into new ways of working within existing teams while some other projects had significant system dependencies meaning not all project outcomes could be achieved until various system upgrades were implemented (eg Innovative Learning Resources and Customer Experience Journey).

In recognition of the above, an increasing focus over 2019 has been given to a more holistic focus on implementing the intent of the Strategic Compass (including the projects) and meeting the four promises within it:

- Raising our ambitions to meet new expectations;
- Adapting our offerings to provide skills for the future;
- Contributing to the new economy and position for prosperity; and
- Investing in our business for viability and value.

This shift has enabled more staff to be part of the journey and is realistic given the lack of ongoing project funding and CIT's budget challenges. Therefore, the CEO recommends that separate Strategic Compass Project reporting to the Audit Committee for 2020 is no longer necessary.

### **Case Studies**

As requested **Attachment B** provides a selection of case studies of successes linked to Strategic Compass implementation for member's information. Increasingly the Executive and staff have recognised that much of the real value of projects has come from the connections between projects and existing teams within CIT not as stand-alone projects per se. The Evolving Together project has demonstrated the importance of developing a culture of collaboration and innovation across project teams and existing teams and that successful Strategic Compass implementation has often involved multiple projects and teams working together to achieve the desired Strategic Compass outcomes. This is best demonstrated through some of the case studies which have been highlighted as part of the presentation to judges for the Australian Training Awards Large RTO of the year award and involved the Business Development and Industry Partnerships Project, the Product Innovation Fund

Project and the Australian Apprenticeship Project working together with existing teams (see **Attachment B1** 2019 ACT Training Awards Case Studies A to G).

Additional more detailed case study information is provided on the Evolving Teacher Project and the Product Innovation Fund (see **Attachment B2**) for the Committee's information.

### **Risks**

Risks associated with the Strategic Compass 2020 Projects continue to be managed through the CIT Enterprise Risk Management Profile. There have been no new risks identified since the last Committee meeting although the Board's discussion on Risk 3 Workforce at its 16 October meeting is relevant to the ongoing implementation of the Strategic Compass implementation (see Agenda Item 9.1 for further details).

### **Recommendation**

1. That the Committee notes the update on the Strategic Compass 2020 and the Board's Strategic Compass priorities and related actions.
2. That the Committee agrees that separate Strategic Compass Project reporting to the Audit Committee is no longer required in 2020.

# 1 Overview

## Purpose

The Canberra Institute of Technology (CIT) commissioned Nous Group (Nous) to conduct a mid-term review (the Review) of the CIT Strategic Compass 2020, Evolving Together (Strategic Compass). The Review was approved by the CEO and CIT Board and endorsed by the Audit, Risk and Finance Committee as part of the 2018-2019 Annual Audit and Review Schedule. The intent of the Review was to assess progress to date and identify areas to strengthen the operation of the Strategic Compass projects and its outcomes. Given the focus on the overall Strategic Compass, this review does not provide detailed evaluations of individual projects. Rather, themes from projects have been identified to provide assessment of the overall Strategic Compass. Such findings and recommendations however will help support adjustments and refinements both to individual projects and to the program overall to improve achievements against the Strategic Compass objectives.

The project commenced in late 2018 and was completed in April of 2019.

## Structure

This report is structured in six parts: 1) Project overview, 2) Strengths, 3) Evaluation of Appropriateness, 4) Evaluation of Effectiveness and Efficiency, 5) Evaluation of Governance, 6) Recommendations

Each is discussed in turn below.

## 2 Overarching strengths identified through the Review

---

Nous' overall assessment: Nous' assessment is that there have been a number of positive shifts in the way CIT operates since commencing the Strategic Compass. These strengths pick up observations on the efficiency and effectiveness of some projects (which is explored in further detail in Section 4), but also point to broader strengths that Nous noticed through consultation.

---

While the focus of this project was on determining the effectiveness and efficiency of the delivery of projects and the program overall, a number of overarching strengths emerged through consultation. Four factors in particular were mentioned as key strengths:

### 1. There is strong commitment to CIT among staff

Multiple stakeholders noted that staff show a strong commitment and a desire to see CIT improve. There are low attrition rates at CIT with many staff committing to the organisation for a significant portion of their careers. While this may generate some negatives, for instance it may be difficult to create fresh energy and easily develop new ways of thinking, many staff noted this in a positive light – staff stay because they enjoy the organisation. One staff member's comment, indicative of the broader sentiment, was the following: *'CIT has an extraordinary culture of people staying and feeling a part of the organisation'*.

### 2. Culture has shifted noticeably at CIT

While cultural change is a specific element of the Strategic Compass (and hence discussed further in Section 4), it was often drawn out as a broader strength of the organisation, as distinct from the effectiveness of the specific project. Staff feel that the Strategic Compass has helped shift the way CIT works, and has contributed to a more positive and innovative culture. This is demonstrated by staff's willingness to embrace new ideas, new skill development (particularly around large project management skills), and CIT's more external focus (described further below). While it is of course difficult to change culture across the entirety of the organisation, and indeed there is some way to go, many stakeholders noted that the ways in which people work together has significantly improved.

### 3. The focus of CIT has become more outward facing

CIT's focus prior to the Strategic Compass was seen as being too internally focused. CIT was seen as not being able to respond effectively to changing market dynamics. Development of new courses was noted as one example of the lack of proactive responsiveness. This however has begun to change. Staff feel that CIT has begun to effectively balance the internal needs of the organisation with being more market orientated and noted that this will enable CIT to be more user-centred and competitive.

### 4. There has been significant progress in a number of projects

A number of the projects have progressed very well and staff have built new capabilities and increased capacity through this process. This is a significant positive, especially considering a number of staff noted that delivery of projects of this size and scale has not occurred frequently at CIT.

## 3 Evaluation of appropriateness

---

Nous' overall assessment: Nous' assessment is that the Strategic Compass and its individual projects were highly appropriate at project initiation and continue to be appropriate into the future. While the intent of projects are still fit for purpose, the end point that they all seek to deliver upon is opaque to staff. Nous identified that there may be some scope to provide greater clarity about how the projects will contribute to the strategic direction of CIT.

---

### 3.1 Strategic Compass was, and continues to be, a necessary response to the changing landscape of tertiary education

The Strategic Compass 2020 was initiated in 2016 to set a new standard in vocational education at CIT. The program encompassed nine projects, tied together by four pillars (being shaping change, governing the region's economy, advancing Canberra's workforce, transforming the business). Nous' view is that this program of work was highly appropriate at the time of inception. CIT's operations in 2016 did not well position the organisation for a changing world. A transformation program was accordingly appropriate.

The specific projects chosen for the transformation also were appropriately selected as being focus areas for CIT. Projects covered the breadth of CIT's operations, from underpinning operations (e.g. digitalisation), culture (e.g. Evolving Together, Product Innovation Fund), and methods of engaging with key stakeholders (e.g. Business Development and Industry Partnerships, Customer Experience Journey). Nous' review did not identify any gaps or projects that should have been selected and implemented in 2016.

The Review also illustrated that these projects continue to be appropriate for the next two years to 2020. The pace of change in the VET sector only continues to increase, and it is necessary for service providers to ensure they are able to adapt appropriately. Nous' work in analysing trends in the VET sector suggest that key challenges that providers and regulators of the VET sector will need be aware of include:

- a greater desire for personalisation and individual fit among students
- the need for continuous learning among practitioners to cater for new and different qualifications, and adopt different approaches to support and incentivise continuous learning among students
- facilitating collaborative delivery between employers and delivery providers to build capability within and outside of the education system
- pre-empting cycles of disadvantage by ensuring that the sector provides an adaptive safety net to support individuals experiencing disadvantage to obtain skills they need.

Given these challenges and opportunities in the sector, it is appropriate that CIT continues to execute the Strategic Compass projects set in 2016. It is also appropriate that the projects continue to focus on enabling activities as opposed to discreet stand-alone projects. This is necessary to enable the goal of broader organisational transformation. One potential gap that CIT may wish to address is the lack of messaging in projects around process change. A transformation strategy will require a number of processes to be redesigned to ensure the organisation is able to implement new ways of working. While these are implicit within projects such as Digitalisation, there is no key project surrounding organisational process change. Business transformation however is one of the key promises within Strategic Compass documentation. It is not necessary to stand up a specific project around this if process change is accounted for, but further communication may be beneficial.

## 4 Evaluation of efficiency and effectiveness

Nous' overall assessment: The Strategic Compass has matured in its project delivery and approach to project management between 2016-2018 and some significant achievements have been made. Some projects have delivered outstanding outputs that are already having a broader impact on the organisation. There are however key areas that can be addressed to improve efficiency and effectiveness. This includes being clearer on program logic, creating stronger project processes, and improving the interconnections between projects.

### 4.1 Some projects have delivered outstanding results, while others have not made material progress

The Review found that the success of the delivery of Strategic Compass projects has varied significantly. Some projects have been extremely successful in terms of their delivery. The Product Innovation Fund stands out as the most effective project due to it helping to produce cultural benefits that outstrips the initial intended scope of the project. Other projects on the other hand have experienced more difficulty. The Customer Experience Journey for instance is significantly behind schedule.

The below table provides our high-level assessment of the status of projects assessed during this Review.

Table 1 | Nous' high-level assessment of individual Strategic Compass projects

Project	Intended benefits	Observations	On track
Australian Apprenticeship (AA)	This project will enable CIT to better meet employer needs and improve AA experiences, reshape perceptions of the value of AA, improve outcomes from AA and more.	This project has moved to BAU. Nous did not identify any concerns in the planning and execution of this project. Outcomes of this project are helping to meet key metrics like employer satisfaction (which was 14 percent above the 2018 target – of 80 percent – now reaching 94 percent).	
Business Development and Industry Partnership (BDIP)	This project will increase capacity and capability, increase profitable partnerships, increase capacity to drive growth in new and existing markets, and increase revenue.	There have been positive strategic relationships with industry formed through BDIP, but further work is required. There appears to be a lack of clarity as to how to navigate the relationship between the project, colleges and external stakeholders, and how to effectively track and measure benefits.	
Customer experience journey	This project will help CIT to attract and retain students and maintain its market share in an increasingly competitive market.	Project is significantly behind schedule due to interdependencies with IT systems not being sufficiently identified.	
Digitalisation	This project will develop and communicate a digital vision, implement technology changes in	Digitalisation has pivoted effectively since 2017 and has begun to produce a number of important outputs. The two	

Project	Intended benefits	Observations	On track
	line with the vision, improve engagement with students and industry, support new business models, and increase productivity.	key projects however have carried over into 2019. Banner 9 not being completed has had flow on effects, impacting the success of other projects. Further success of the Digitalisation project is also dependent on receiving funding in the upcoming ACT Budget, hence its future success is not certain.	
Evolving Teacher	This project will build a highly skilled teaching workforce, role model contemporary practice, develop strong pedagogical and digital skills, develop a client service culture and more.	Evolving Teacher appears to be on track in terms of producing outputs. An area though that requires further work is the need to engage more broadly across teachers. Staff from other projects noted that some teachers still do not understand, or are reluctant, to be a part of the transformation journey. College Directors also noted that teachers do not have sufficient understanding of this project and many have not engaged.	
Evolve Together	This project will equip staff with improved capability, address system and process change, develop a culture of evolving together and more.	Staff have noted that culture has significantly changed and improved which illustrates that the project is on track.	
Innovative Learning Resource Project (ILR)	This project will increase quality and consistency of CIT's teaching resources, implement standard practices around resource design, better utilise resources, position CIT to more effectively operate in a contestable environment, and allow CIT to readily demonstrate compliance.	ILR, similar to Digitalisation, has undergone a pivot in the last year. The focus has become more defined and targeted. The lack of ability to track benefits effectively, both due to methodological and analytics issues, means it is difficult to assess whether this project is on track. Work done in ILR also at times is in conflict with work being done in other projects. College Directors also noted that ILR resources are not understood or being leveraged effectively by teachers.	
Product Innovation Fund (PIF)	This project will encourage greater innovation in CIT, provide seed funding to kick start innovation ideas, improve CIT's innovative reputation and more. It has been developed and run in collaboration with CBRIN.	The PIF has helped to develop a more positive, innovative and entrepreneurial culture at CIT that transcends just the people who have gone through the project. It is a highly successful project that has helped shift the way CIT operates.	
Campus modernisation	Not assessed		
 = On track  = Some issues  = Significant issues			

## 4.2 Program logic gaps impact the efficiency and effectiveness of Strategic Compass

A program logic approach provides a framework to map inputs, outputs, outcomes, and overall vision. Such a framework helps to clarify what each project should be achieving, and provides a useful point of reference for staff to understand how their work fits into a broader context. Nous' assessment is that while this is clear for some projects, other projects do not have a clear link between these various elements. This appears to be contributing to a degree of siloing between projects. Some staff noted that while they understood their project well, it was difficult to understand other projects' intent and purpose.

There also does not appear to be a clear program logic at the overall Strategic Compass level. This creates difficulties in providing a logical narrative around the Strategic Compass projects. While the Strategic Compass has the four promises, there is an insufficient understanding among staff of CIT's vision and role.

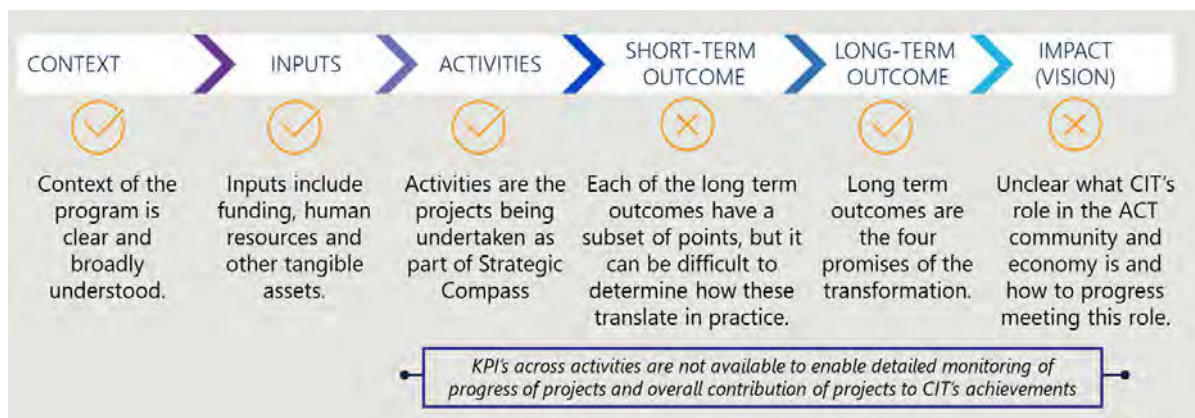

In part, this is due to the deliberate shift that CIT has made away from measuring the transformation program with a series of specific metrics, and more towards a 'heuristic' based approach whereby staff are provided a guiding sense of the direction of change. Consultation with staff illustrated however that further communication and clarification around this approach is necessary. While senior executive staff appear to have made the mindset shift required for this new transformation method, staff at other levels have found it more difficult. As one staff member noted, *'It has been difficult to know how to operationalise Strategic Compass'*.

Nous' conclusion also is that while CIT's additional approach has benefits, it would be more effective if balanced with a tangible vision, role and metrics. This is important for two reasons: 1) it provides a more concrete reality to motivate and align staff, and 2) it provides more defined outputs for staff to know they are achieving what the organisation requires. The Review also identified that the transformation program has not been sufficiently connected with the metrics that CIT reports on to government. This has led to confusion among staff as there have been instances where they feel government KPIs and the transformation program have been at odds. This again leads to an inconsistent engagement with the Strategic Compass and concerns that the projects are detracting from the capacity to meet the KPIs. For example, stakeholders reported that allocation of staffing resources from their areas to Strategic Compass projects had meant fewer resources to deliver on activities covered by the KPIs.

Gaps within the program logic, along with absence of clear key performance indicators, made it difficult to conduct a strong assessment of the effectiveness and efficiency. As such, while this review was able to identify both strengths and areas of improvement, a more formal summative evaluation in 2020 may be unable to determine the true extent of effectiveness and efficiency. A visual illustration of where gaps exist is highlighted in

Figure 2.

Figure 2 | Program logic and identified gaps

### 4.3 CIT can continue to improve upon its developing project management capabilities

Each project goes through three key phases: 1) project set-up, 2) project delivery, 3) project closure. In each of these, a number of core processes are required to ensure effective project delivery. This process is illustrated in Figure 3 below.

Figure 3 | Project stages and example activities

The initial project management processes for the Strategic Compass were over burdensome and not fit-for-purpose for CIT's needs. It appears that CIT has begun to pivot away from such processes and adopted methods more suitable for the organisation. This is a positive and illustrates a maturing of capability at CIT. As stakeholders noted during consultation, CIT has not traditionally had strong project management processes, so it is expected that there would be 'growing pains' as such systems are formalised.

The Review however identified that there is potential for further maturation. A number of processes are not operating effectively which is impacting upon the ability for projects, and ultimately the overall program, to meet the aims of the Strategic Compass. As one staff member noted, *'while we teach PM, we don't practice it effectively'*. Another staff member noted, *'I'd say we've done things the hard and long way because things are informal. It's taken more meetings, more time, more energy...it's less efficient'*.

Three key areas across the project lifecycle that require further strengthening are detailed below. Note, further issues related to project delivery such as management of interdependencies, management of benefits, and governance are detailed separately in Section 4 and 5 of this report.

#### **Project Initiation: Stronger project set up would be beneficial for future projects**

The Review identified that projects were not adequately set up for success, resulting in some projects wasting time and effort determining what was needed. Project scope, project plans and timelines,

dependencies and deliverables need to be laid out clearly from the outset to ensure clarity on what is required. Two examples where project initiation shortfalls created problems were:

- **Digitalisation project:** Digitalisation spent its first year exploring what was required. While this may be necessary in part to assist in homing in on key issues, a one year exploration process over a four year project is a significant investment. Stronger project set up over 2018 however has helped pivot the Digitalisation project and make it more successful in achieving tangible outputs.
- **Customer Experience project:** Customer Experience commenced without sufficient understanding of the interdependencies with IT and other requirements. As such, despite its importance as a project, it has been unable to significantly progress. Staff noted that this project was an example of insufficient planning occurring at the outset of a project.

#### **Project delivery: More regular review will help to refine projects**

As noted previously, some projects pivoted effectively as it became apparent that the project required reframing. Each pivot however occurred after at least 25 percent of the project time had elapsed. This is a significant sunk cost. While these projects did pivot successfully, the Review did not identify a systematic process to ensure that all projects were reviewed. As such, potential project adjustments may be required that have not yet been identified.

#### **Project closure: Clearer transition to BAU to ensure benefits of project remain**

Some projects are beginning, or have already, transitioned to BAU. There is however some apprehension over this process. Specifically, staff worry that a move into BAU may mean that new processes and ways of working will be lost in the old processes. In part, this is reflective of the fact that further planning could occur to ensure a staged transition to BAU. It is also illustrative of the fact that projects and BAU have not sufficiently been intertwined earlier during project delivery (see Section 5.3 for further detail). Further work on cultural change will also support project outcomes and proposed changes to be more readily accepted.

## **4.4 Further definition of the benefits to be generated by projects would assist in achieving positive outcomes**

Each project has a stated list of benefits it seeks to achieve. Some staff were extremely positive in noting that they had seen strong benefits stem from their projects.

The translation though of these stated benefits to the tracking and delivery of such benefits can be strengthened. Some staff noted that they had not seen formal benefit realisation plans that clearly articulated what the project sought to deliver and monitoring of progress against these benefits.

## **4.5 Engagement with the Strategic Compass is inconsistent at different levels across CIT**

As noted in Section 2, the Strategic Compass has resulted in strong positive cultural change. Engagement with the cultural change program in particular is strongly seen at senior levels of the organisation. Project managers and project leads for all Strategic Compass projects show an extremely strong desire to deliver high quality outcomes for the organisation. Senior staff have a strong engagement with the intent of the Strategic Compass.

Consultation however noted that engagement diminished further away from executive management. This is not unexpected. Significant cultural change is difficult to accomplish in a short time-frame. Constraints

and lack of certain levers in the public sector make this more challenging. One reason for the lack of engagement though is the inability of some staff to see their role in the transformation process. It was noted that some staff feel that *"things are happening to them"* and that *"things are happening in a vacuum"* as opposed to feeling a part of the transformation journey. This is particularly true for staff who do not contribute directly to the outcomes of a Strategic Compass project. Culture in corporate services in particular was noted as being slow to change.

Despite this, the majority of staff interviewed reinforced that while further improvement is necessary, and growing pains have been felt, the commitment to the Strategic Compass has grown year on year.

## 5 Evaluation of governance

Nous' overall assessment: Strategic Compass governance has evolved since its inception. Current structures are more streamlined and have stronger executive leadership. The Review identified that governance structures are broadly appropriate. The manner in which governance structures are used however can continue to be strengthened. Some more definitive cross-project governance arrangements may be required as well to better manage the interdependencies between projects.

### 5.1 Introducing executive leads has helped provide greater strategic oversight

The governance structures for Strategic Compass have been refined over the past two years. The current structures (e.g. Evolving Together Advisory Group (ETAG) and Project Manager (PM) meeting) both resonate strongly with staff and are appropriate from Nous' perspective. Staff specifically noted that the introduction of executive leads as project leads was beneficial as it provided greater leadership and oversight for projects.

While the structures are appropriate, the way that elements of the governance operate could be strengthened to support implementation of Strategic Compass more effectively. These elements are discussed below.

### 5.2 Current governance structures would benefit from greater clarity of purpose and intended outcomes

ETAG meetings were noted by the majority of stakeholders as being an interesting and relatively informative method of learning about different projects. It was noted by some that ETAG meetings help to challenge and push projects which is beneficial for the overall direction that projects take. Staff however noted that ETAG meetings are predominately used as a means to provide project status updates rather than to drive project performance. As one staff member noted, *'If ETAG's TORs are making sure that everyone is on the same page, then it is doing that'*. However, ETAG's TORs are broader than just information sharing, and in particular include points around interdependencies, risk management and more. Discussion of such topics would strengthen management of them and provide an escalation point if necessary. As Table 2 below illustrates, Nous' analysis indicates that not all of ETAG's Terms of Reference are being effectively enacted.

Table 2 | Evaluation of extent to which ETAG TOR's are being met

Role	Detail	Evaluation
1	Advice and recommendations on the current status of the Strategic Compass Evolving Together Projects, their ongoing development and the future implementation of the Strategic Compass projects	ETAG appears to successfully meet this TOR.

Role	Detail	Evaluation
2	Advice and recommendations on project interdependencies, opportunities, issues and risk management to maximise implementation of the Strategic Compass 2020 directions	ETAG does not appear to successfully meet this TOR.
3	Present papers prepared by project managers, executive leads and other ETAG members	ETAG appears to successfully meet this TOR.
4	Advice and recommendations on progress in CIT's transformation and achievement of the Strategic Compass directions Progress	Insufficient evidence to evaluate whether this TOR is being met.

Some staff noted that ETAG meetings could become unbalanced in terms of time spent on one or two projects. Other staff also noted that ETAG could be more '*frank and fearless*' in terms of the information delivered and indicated that, at times, ETAG felt more like a '*sales pitch*' forum.

The second key element of the governance structures are the project managers meeting. This is a useful additional governance layer to help project managers stay on track. These meetings however also at times do not meet their intended Terms of Reference. Rather than discuss connections between projects, the Review heard that these meetings predominantly act as an additional update meeting.

### 5.3 Informal collaboration occurs well, but interdependencies can be better managed

Collaboration between projects, while at times very successful, currently is an informal process. Project Managers, or other project staff, identify where dependencies may exist and set up individual structures to work through potential issues. While it is a positive that staff are proactively seeking to make connections, the risk of this informal process is that issues are identified too late, or not identified at all, and that there are not clear escalation processes for resolving concerns that cannot be managed at the Project Manager level.

One of the key issues staff continuously raised through the Review was the lack of dependency management between projects. This is impacted due to governance (as noted above) but also due to the lack of additional systems in place. Processes such as risk registers, responsibility matrices, dependency maps do not appear to be systematised. This has led to some significant issues, for instance the inability of customer experience to make progress, but is also resulting in missed opportunities for projects to support each other.

### 5.4 There is insufficient connection between project work and BAU

There currently appears to be a distinct dichotomy between projects and BAU. Projects sit outside of BAU, are resourced differently and have separate teams working on them. This is appropriate where projects are delivering outputs that are quite different to BAU work. The majority of Strategic Compass projects however aim to change the way that CIT operates as an organisation, and to be successful, need to create significant shifts in how business is conducted. Evolving Teacher and ILR for instance are focused specifically on teaching staff and how to improve pedagogy and the student experience. Evolving Together seeks to create cultural change across the organisation. BDIP should ultimately impact how all colleges do business development.

Given the insufficient relationship between BAU and project work, there appears to be confusion about the relationship between the projects and the broader business of CIT. Approaches that more effectively embed project activities within business areas would enable the projects to more directly impact on BUA activities, and would support a smoother transition of projects activities into BAU.

## 6 Recommendations

---

Nous has identified five recommendations for CIT. These stem from findings identified in the above sections. Recommendations are detailed below.

---

### 6.1 Develop a stronger program logic between projects, outputs, outcomes and vision

While some projects understand how they link to four strategic pillars, others do not. It is imperative that all projects, and the program overall, have a strong program logic.

This need not be top-down mandated. Indeed, given CIT's goal of empowering staff and creating a transformation that fundamentally shifts the way business is conducted, this is not recommended. The program logic approach should however seek to balance CIT's desired fluidity in doing and measuring business, with more concrete measures to help staff know they are on track. These measures in turn should link to the KPIs that CIT reports on to the ACT Government.

The program logic should also fundamentally seek to illustrate how much of the Strategic Compass is about delivering 'horizontal enabling' projects that impact upon multiple parts of the organisation.

### 6.2 Increase communication around Strategic Compass

While there is an understanding that the projects work together to create a 'program of work', this understanding is not shared across the organisation. A significant number of stakeholders see projects as isolated initiatives. It is imperative to foster stronger understanding around the interlinkages between projects. Furthermore, it will be important to ensure there is alignment and shared understanding of the role of CIT in the ACT community and economy.

To do this, CIT should seek to significantly increase the amount of communication about Strategic Compass, particularly for staff at more junior levels, or staff in delivery areas. This should include both generic communication (e.g. updates on overall progress), and more tailored communication that relates to the specific functions of business areas.

Given some staff feel that decisions are being made in a vacuum, it is recommended that communications on key decisions be shared much more widely. Effective organisational transformation requires strong buy-in at all levels which is aided by frequent communication.

### 6.3 Strengthen project management processes

While it is not recommended that CIT revert back to the initial rigid methods of conducting projects, it is recommended that further consideration be given to strengthening project management methods. In particular, the Review recommends the following areas be strengthened:

- Ensuring more rigorous tracking and accountability of projects and assessment of the benefits delivered

- Ensuring more defined processes for reviewing and recalibrating timeframes and deliverables
- Using, where appropriate, more agile delivery of projects to quickly test and iterate on the project process
- Map interconnections between projects and ensure dependencies are planned and accounted for.

## 6.4 Establish clearer and more streamlined governance mechanisms

The Review recommends that the ETAG governance group be confined to a smaller group to enable more robust conversation to occur. Currently, there can be over 40 participants which is too large to enable in-depth analysis and decision making about project progress. As such, currently ETAG acts as only an update body.

It is recommended that there also be a Terms of Reference re-set for ETAG. This body should act to determine project risks, identify interdependencies and raise hard truths about project progress. This should be re-acknowledged to help provide impetus for people to begin raising such conversation topics.

## 6.5 Enable a deeper relationship between projects and BAU

Nous recommends that CIT determine mechanisms to ensure that projects and BAU are more intertwined. This will include use of governance mechanisms, involving more staff into the delivery of projects, increased communication between projects and staff it will involve, devolvement of project responsibility to more staff etc. The principal throughout each of these methods though should be to encourage staff to see projects as horizontal, cross-cutting initiatives that impact right across the organisation. As such, where possible, project work should be conducted in collaboration with a range of staff members and embedded directly in the business areas that the projects are seeking to influence.

## CIT BOARD PRIORITIES AND ACTIONS FOR STRATEGIC COMPASS IMPLEMENTATION IN 2019

	Priorities	Related Actions	Update as at end March 2019
1.	Building additional capacity and industry partnerships in emerging industries and areas of government demand (such as cyber, renewables, health and education).	<ul style="list-style-type: none"> <li>Pursue market opportunities in the Government's priority areas.</li> </ul>	<ul style="list-style-type: none"> <li>To support additional capacity in the cyber and allied health industries, CIT secured two Government grants: \$0.7 m to build CIT's Training Security Operational Centre (TSOC) and \$0.5 m to build a simulated Allied Health Training Facility. The TSOC is operational and the Allied Health facility is due for completion by July 2019.</li> <li>Development of fully online, accredited commercial program in Cyber awareness (single UoC). Pilot program underway with CIT staff as learners building CIT's capacity to deliver and assess program to national markets.</li> <li>CIT, with [REDACTED], hosted Finals of first Australian National Youth Cyber Defence Competition, Cyber Taipan.</li> <li>CIT secured two additional grants to deliver a project on increasing the engagement of mature workers into formal training at CIT to improve their employment outcomes, and a project for women in trades to promote those trades to women that are traditionally dominated by males.</li> <li>CIT has launched Ctrl-IT, a portal to connect CIT students/graduates with employers who have employment opportunities. Initiative welcomed by industry as a way of facilitating connections between CIT's work ready graduates and real jobs. The 2019 pilot is for the Cyber and IT sectors only at this stage.</li> <li>CIT continues to seek National Partnership Skilling Australia Funding targeting market opportunities in the Government's priority areas.</li> </ul>
		<ul style="list-style-type: none"> <li>Industry Advisory Groups (IAGs)– refresh CIT Industry Advisory Groups for greater industry engagement and market intelligence and link to the Board.</li> </ul>	<ul style="list-style-type: none"> <li>A CIT Board Teleconference (April 2019) endorsed a new 3 tier approach to strengthen industry engagement: <ul style="list-style-type: none"> <li>Active and engaged IAGs using consistent terms of reference with some content provided centrally</li> <li>Six-monthly Industry Forum, hosted by the CIT CEO, to connect members from all IAGs; and</li> <li>Annual ACT Industry Leaders event, hosted by the CIT Board</li> </ul> </li> <li>College Directors liaising with existing and new industry representatives to participate in IAGs.</li> </ul>

	Priorities	Related Actions	Update as at end of March 2019
2.	Improving the recognition of CIT as a major economic and social contributor to the ACT and region, now and into the future.	<ul style="list-style-type: none"> <li>Communication Strategy for distribution of Report titled <i>Canberra Institute of Technology: Economic and Social Contribution to the ACT</i> (February 2019).</li> <li>Successful engagement with Economic Development Sub Committee of Cabinet (April 2019).</li> </ul>	<ul style="list-style-type: none"> <li>On hold – working with Minister’s office re involvement in launch of Report.</li> <li>18 April 2019 Economic Development Sub Committee of Cabinet meeting cancelled. Board Chair and CEO to present to a rescheduled Economic Development Sub Committee of Cabinet.</li> </ul>
3.	<p>Enhancing contemporary organisational transformation and workforce development at CIT through ongoing investment in our people through:</p> <ul style="list-style-type: none"> <li>the overarching <i>Evolving Together Project</i> (with a greater focus on middle management and Heads of Departments);</li> <li>the <i>Product Innovation Project</i> which has successfully demonstrated the importance of collaboration and innovation across CIT.</li> </ul>	<ul style="list-style-type: none"> <li>Evolving Together Design Team supported to develop and implement a CIT platform of appropriate tools for the transformation of people, processes and systems.</li> <li>Utilise micro-narrative capture and network mapping tools to map connections and disposition levels across CIT to determine enablers and constraints and enhance organisational transformation.</li> <li>Undertake leadership and business management development for middle management and Heads of Departments.</li> <li>Expand the PIF program to include <ul style="list-style-type: none"> <li>the availability of basic design thinking Units of Competencies (UOCs) to all CIT staff utilising the [REDACTED] trained CIT teachers</li> <li>Partnering with industry to embed industry into the [REDACTED] PIF programs to develop new products and services eg. Renewable Energy Hackathon</li> </ul> </li> <li>Further leverage the alignment of the Evolving Together and Product Innovation project approaches to drive innovation, collaboration and transformation at CIT.</li> </ul>	<ul style="list-style-type: none"> <li>The Design team has been formed and has been undertaking extensive research and analysis of theory and tools as the initial step in the development of a transformational platform.</li> <li>Evolving Together CEO Leadership Forum in April 2019 with 90 staff including middle management and Heads of Department to improve knowledge and awareness of organisational transformation at CIT.</li> <li>Renegotiated new contract with [REDACTED] for 2019 with additional capacity to deliver ongoing incubator program throughout 2019.</li> <li>First cohort for 2019 incubator program commenced involving 20 CIT staff (including teachers, Heads of Departments, and general staff).</li> <li>Delivered Renewable Energy Hackathon to industry and ACT student groups in partnership with [REDACTED] utilising the PIF program outline.</li> </ul>

	Priorities	Related Actions	Update as at end of March 2019
4.	Maintaining focus on <i>Transforming our Business</i> through people, processes and system changes including fully understanding the costs of service delivery.	<ul style="list-style-type: none"> <li>Drive continuous business improvement through transforming the delivery of corporate functions across CIT with coordination and integration with other ACT Government agencies where cost effective and efficient.</li> </ul>	<ul style="list-style-type: none"> <li>A CIT Learning and Development calendar is being developed to provide timely and cost-neutral capability development for all CIT staff aligned to the ACTPS capability framework.</li> <li>A revised Setting My Direction (CIT's performance and development framework) was launched in April 2019 with renewed focus on performance development conversations and improving and embedding a development culture for the organisation.</li> <li>Pilot program for the transition to using Shared Services website for HR related actions will commence in May aimed at reducing duplication and improving the efficiency of HR and some Finance processes across CIT.</li> <li>Review of all delegations (Finance, HR and Educational) has been undertaken to streamline and better integrate business processes and ensure that the level of delegation meets the business needs.</li> <li>A proposal to pool CIT Fleet vehicles at Reid and Bruce for greater efficiency is being assessed by Corporate Resources Sub Committee.</li> <li>A project has commenced to review and improve reporting across CIT to give managers, the executive and the Board greater ability to monitor and manage CIT performance and outcomes. Improved financial reports are already assisting divisions in their financial management.</li> </ul>
5.	Driving <i>Campus Renewal</i> at Reid as part of the City East Education Renewal Precinct with [REDACTED]	<ul style="list-style-type: none"> <li>Budget Bid development and implementation for Reid Campus Renewal.</li> </ul>	<ul style="list-style-type: none"> <li>Budget Business Case finalised and progressed through all required Committees.</li> <li>Minister approved Budget Business Case. Awaiting approval of Business Case as part of ACT Government 2019/20 Budget.</li> <li>The scope of works detailed in the 2018/19 Reid Business case nearing completion except the [REDACTED] integrated masterplan which is on hold pending the ACT Government's decision regarding [REDACTED]</li> </ul>
		<ul style="list-style-type: none"> <li>Continue to implement campus renewal through ongoing support to the CIT Campus Modernisation Sub-Committee.</li> </ul>	<ul style="list-style-type: none"> <li>Additional CIT Campus Modernisation Sub-Committee meetings to be scheduled [REDACTED].</li> </ul>
6.	Investing in digital infrastructure including as part of CIT's Campus Renewal and in line with the Chief Minister's ambitions for Canberra.	<ul style="list-style-type: none"> <li>Budget Bid development and implementation for new CIT ICT environment (including Desktop, Network and Application project).</li> </ul>	<ul style="list-style-type: none"> <li>Budget Business Case finalised and progressed through all required Committees.</li> <li>Minister approved Budget Business Case.</li> <li>Awaiting approval of Business Case as part of ACT Government 2019/20 Budget.</li> </ul>

	Priorities	Related Actions	Update as at end of March 2019
7.	Reshaping education and training products ( <i>Innovative Learning Resources- ILR Project</i> ) and enhancing teacher capability (including digital fluency) through the <i>Evolving Teacher Project</i> .	<ul style="list-style-type: none"> <li>Continue development of high quality training products, which have the capacity to maximise student numbers and learner satisfaction whilst reducing delivery costs.</li> </ul>	<ul style="list-style-type: none"> <li>Evolving Teacher roll out of self-assessment tool for Teacher Professional Learning Capabilities to inform Setting My Directions conversations and Professional Development provision and selection.</li> <li>ILR focusing on high volume Units of Competencies (UoCs) to support quality, consistency and improved learner experience and protect CIT IP and increase productivity.</li> </ul>
		<ul style="list-style-type: none"> <li>Investigate and analyse potential benefits from the Banner 9 upgrade in April 2019 for improving learning resources and program delivery</li> </ul>	
		<ul style="list-style-type: none"> <li>Continue to target support and training for trainers and assessors.</li> </ul>	<ul style="list-style-type: none"> <li>Evolving Teacher extending 2018 digital coaching pilot and mentoring pilot to address skill gaps and build capability.</li> <li>Evolving Teacher continued provision of targeted skill building PD including <i>CIT Conversations</i>, blended learning facilitation strategies and <i>bits and bytes</i> modules.</li> </ul>
		<ul style="list-style-type: none"> <li>Develop and implement a framework for the design and delivery of blended learning models across CIT.</li> </ul>	<ul style="list-style-type: none"> <li>Blended learning models developed with validation testing commenced in ILR priority courses.</li> <li>Supported by ILR, Evolving Teacher lead development of teaching and learning materials in high volume Units of Competencies in Health Community Services to standardise delivery across departments, improve student experience and protect CIT IP.</li> </ul>

## Key Achievements

- ▶ Cultural Traits Presentation to staff
- ▶ Evolving Together Staff event held
- ▶ Increased collaboration between projects and across CIT
- ▶ Improved visibility of program financials
- ▶ Projects shifting to implementation phase

## Key Risks

- ▶ Lag in some project commencement may lead to challenges in managing dependencies. Action is currently being taken to rectify the slippage

**CIT Board Paper**

---

<b>Agenda Item:</b>	<b>4.2</b>
<b>Title:</b>	<b>Strategic Compass - Program Dashboard</b>
<b>Outcome:</b>	<b>Noting and feedback</b>

---

**Recommendation:** The CIT Board note the current status of the Strategic Compass Program, and provide feedback on the presentation and content of the current dashboard to enable ongoing improvements.

<b>Issues Summary</b>	Refer dashboard
<b>Key Risks</b>	Refer dashboard
<b>Financial Implications</b>	Refer dashboard
<b>Consultation</b>	The following have been consulted in developing the proposed project dashboard: CIT Executive, Project Sponsors, Project Managers and Key Stakeholders

**Background**

The CIT Strategic Compass 2020 – Evolving Together includes nine new commitments, which includes flagship initiatives that the CIT Board, the Business Development and Cultural Change Sub-committee and CIT began developing last year. The launch of the Strategic Compass 2020 in July 2016 provided an opportunity to announce the new commitments and the associated funding to build momentum around CIT's future directions.

█ was contracted to conduct a review of the current state of the Project Management capability of CIT, to be able to deliver the initiatives above. This review identified gaps in the current capability and subsequently introduced a suite of Project Management tools to uplift CIT's capability.

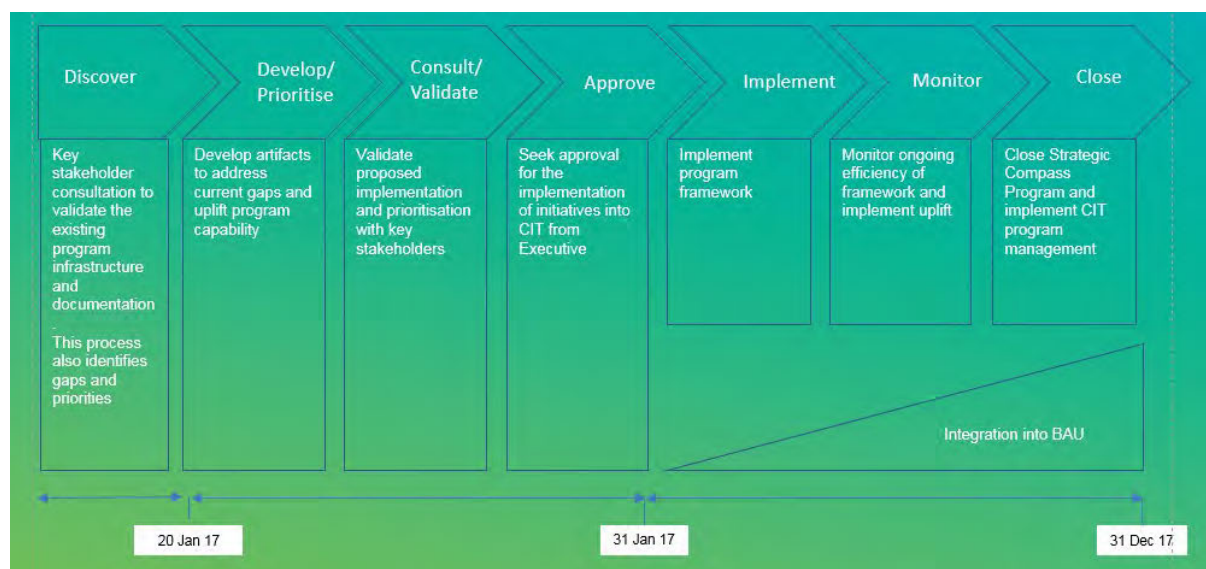

In addition, the review also recommended the establishment of a Program Manager role and a Program Management Office (PMO) function. Subsequently, the Strategic Compass Program Manager was recruited and commenced on 16 January 2017.

■ was retained until the end of February, to support the on boarding of the Program Manager and continue to build ongoing capability across CIT in Strategic Planning and Benefits Management.

### Program Management Implementation

On commencement, the Program Manager conducted a rapid assessment to identify the Program and Project management implementation successes to date and subsequent gaps requiring attention. This assessment also included developing a structured methodology for the integration of Program and Project Management into the ongoing operations at CIT over the next twelve months. The proposed approach for integration is outlined below

### Assessment

The findings from the assessment are outlined below:

1. **Program Governance:** There is a lack of clear delineation between existing organisational structures and program governance structures. This could impact the ongoing oversight of the program, by focusing on business as usual activities as opposed to program matters. De-prioritisation of program matters results in scheduling delays and cost overruns.
2. **Project Documentation:** Projects are currently at various stages of completing the project documentation previously implemented. This may delay commencement or impact delivery if not addressed as a priority
3. **Program Financial and Procurement:** Current arrangements do not differentiate between ongoing operational delegation and program financial delegation. This has the potential to create situations in which approvals are carried out within operational delegation, without consideration for the broader impact on the organisation

4. **Program reporting:** There is a lack of clarity on the current progress and financial status of projects. This is compounded by the need to continue to standardise templates used across projects
5. **Program overview and scheduling:** There is the absence of an overarching program schedule, which could result in issues in tracking dependencies between projects
6. **PMO tools:** current PMO tools are comprehensive, but require further tailoring to suit the operating environment at CIT and as well as alignment with existing frameworks (for example Risk Management)

### Proposed Resolutions

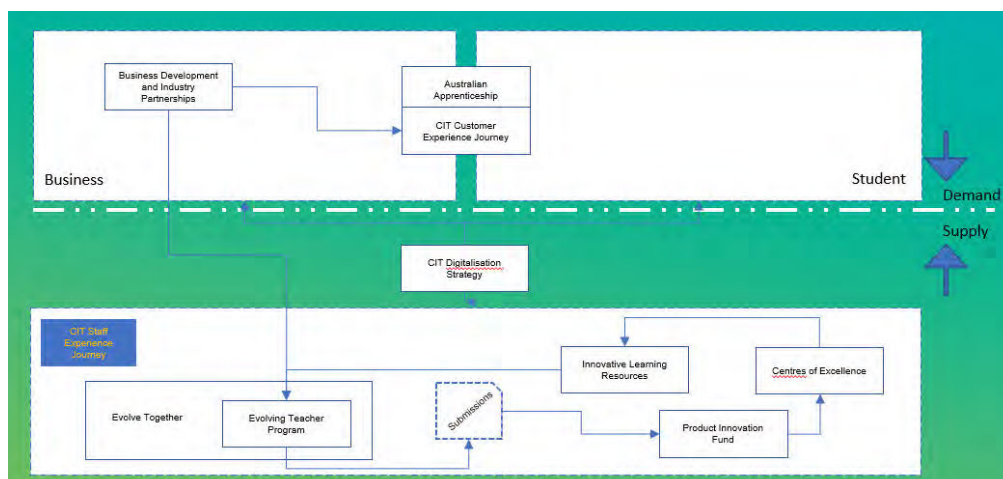

On finalisation of the assessment, the following resolutions were proposed and accepted by the CIT Executive. These are currently being implemented and are expected to continue to uplift internal capability.

Issue #	Issue	Resolution
1	Program Governance	<ul style="list-style-type: none"> <li>- Establish Implementation Group</li> <li>- Develop program financial delegations, that different business as usual executive roles from Project sponsor roles</li> </ul>
2	Project Documentation	<ul style="list-style-type: none"> <li>- Ensure that all project documentation are completed</li> </ul>
3	Program Financial and Procurement	<ul style="list-style-type: none"> <li>- Develop program guidelines/ procedures for financial and procurement management</li> <li>- Document project financial planning and reporting cycles and templates</li> </ul>
4	Program reporting	<ul style="list-style-type: none"> <li>- Standardise and streamline program and project reporting</li> <li>- Ensure that projects are tracking to agreed schedule</li> <li>- Develop dashboard reporting (including financial) scaled for target group (e.g. Board, Executive)</li> </ul>
5	Program overview and scheduling	<ul style="list-style-type: none"> <li>- Document program overview and schedule</li> </ul>
6	PMO tools	<ul style="list-style-type: none"> <li>- Assess the PMO tools for scalability</li> <li>- Implement centralised repository for PMO tools to enable ease of access</li> </ul>

### Additional Information

Provided below are additional artefacts developed as part of the ongoing implementation.

1. **Program Mind map:** As part of the implementation, an initial map (displayed below) has been developed to identify the potential linkages and dependencies across the program. This map will evolve as projects mature.

2. **Program Dashboard:** The existing program dashboard has been revised to facilitate strategic oversight and decision making. The revised version is attached for noting and feedback. It is expected that the functionality of the dashboard and the metrics used will continue to mature as program management is integrated deeper into CIT's capability. A user guide has also been provided below.

As additional tools emerge, the recurring program status update will continue to provide the CIT Board with further insights. This will be done in order to continue to build confidence from a Board perspective, through exposure to the underlying rigor with which the program is being managed.

**CIT Board Paper**

---

**Agenda Item:** Program Dashboard  
**Title:** Strategic Compass Program Dashboard  
**Outcome:** for noting

---

**Recommendation**

**The CIT Board:**

**1. Note the current status of the Strategic Compass Program**

<b>Issues Summary</b>	Refer dashboard
<b>Key Risks</b>	Refer dashboard
<b>Financial Implications</b>	Refer dashboard
<b>Consultation</b>	The following have been consulted in developing the proposed project dashboard: CIT Executive, Project Sponsors, Project Managers and key stakeholders

**Background/Issues**

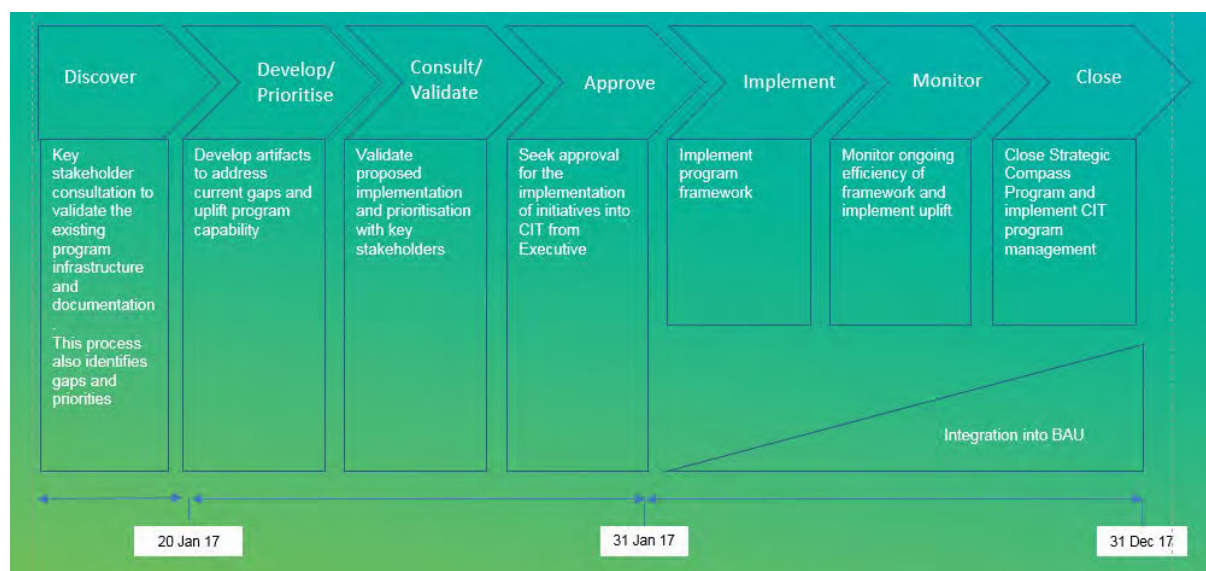

The Strategic Compass 2020 document includes a new commitments page which includes flagship initiatives that the Board, the Business Development and Cultural Change Sub-committee and CIT have been developing this year. The launch of the Strategic Compass 2020 document provided an opportunity to announce the new commitments and the associated funding to build momentum around CIT's future directions.

■ was contracted to conduct a review of the current state of the Project Management capability of CIT to deliver the initiatives above. This review identified gaps in the current capability and subsequently introduced a suite of Project Management tools to uplift CIT's capability.

In addition, the review recommended the establishment of a Program Manager role and a Program Management Office (PMO) function. The Strategic Compass Program Manager was recruited and commenced on 16<sup>th</sup> January 2017.

■ was retained till the end of February to support the on boarding of the Program Manager and continue to build ongoing capability across CIT in Strategic Planning and Benefits Management.

On commencement the Program Manager conducted a rapid assessment to identify the Program and Project management implementation successes to date and subsequent gaps requiring attention. In addition a structured methodology for the integration of Program and Project Management into the ongoing operations at CIT over the next twelve months was developed. The proposed approach for integration is outlined below

The following gaps were identified that required attention

1. **Program Governance:** there was a lack of clear delineation between existing organisational structures and program governance structures. This could prevent the ongoing oversight of the program with the focus being on business as usual activities instead of program matters. Incorrect prioritisation of program matters is known to create delays in progress approvals.
2. **Project Documentation:** projects were found to be at various stages of completing the project documentation previously implemented, which had the potential to delay commencement or impact delivery
3. **Program Financial and Procurement:** the current arrangements do not differentiate between ongoing operational delegation and program financial delegation, potentially creating situations in which approvals are carried out within operational delegation without consideration for the broader impact on the organisation

4. **Program reporting:** There is a lack of clarity on the current progress and financial status of projects. This is compounded by the need to continue to standardise templates used across projects
5. **Program overview and scheduling:** There was the absence of an overarching program schedule, this creates issues in tracking dependencies
6. **PMO tools:** current PMO tools are comprehensive, but requiring tailoring to suit the operating environment at CIT and alignment with existing frameworks (for example Risk Management)

A number of proposed recommendations were made to resolve the gaps identified in order to more tightly integrate the ongoing monitoring and management of the program. The recommendations were as follows:

Issue #	Issue	Resolution
1	Program Governance	<ul style="list-style-type: none"> <li>- Establish program board</li> <li>- Develop program financial delegations, that different BAU executive roles from Project sponsor roles</li> </ul>
2	Project Documentation	<ul style="list-style-type: none"> <li>- Ensure that all project documentation are completed</li> </ul>
3	Program Financial and Procurement	<ul style="list-style-type: none"> <li>- Develop program guidelines/ procedures for financial and procurement management</li> <li>- Document project financial planning and reporting cycles and templates</li> </ul>
4	Program reporting	<ul style="list-style-type: none"> <li>- Standardise and streamline program and project reporting</li> <li>- Ensure that projects are tracking to agreed schedule</li> <li>- Develop dashboard reporting (including financial) scaled for target group (e.g. Board, Executive)</li> </ul>
5	Program overview and scheduling	<ul style="list-style-type: none"> <li>- Document program overview and schedule</li> </ul>
6	PMO tools	<ul style="list-style-type: none"> <li>- Assess the PMO tools for scalability</li> <li>- Implement centralised repository for PMO tools to enable ease of access</li> </ul>

## CIT PRODUCT INNOVATION PROJECT RISKS - 2018

1.	<i>Lack of take-up of product innovation project</i>	<b>Source</b> <ul style="list-style-type: none"> <li>Build on the success and lessons learnt of 2017.</li> </ul> <b>Impact</b> <ul style="list-style-type: none"> <li>Potential loss of momentum and capability development more broadly across CIT.</li> <li>Disengagement, loss of productivity to innovate.</li> </ul>	<b>Likelihood</b>  <b>LIKELY</b>  <b>Consequence</b>  <b>HIGH</b>	<ul style="list-style-type: none"> <li>Engagement of Canberra In innovation Network 2018</li> <li>Build internal capability.</li> <li>Advertise next round.</li> <li>Small groups of CIT staff to co-facilitate workshops.</li> </ul>	<ul style="list-style-type: none"> <li>Target staff who have potential capability and who could benefit from the Project.</li> <li>Focus on programs such as Cyber; Energy Renewal and Health.</li> <li>Build two small cohorts of products: March – June and July – December.</li> </ul>	<b>Likelihood</b>  <b>POSSIBLE</b>  <b>Consequence</b>  <b>MEDIUM</b>	Project Manager  March – June 2018 July – Dec. 2018

## CIT BOARD PRIORITIES AND ACTIONS FOR STRATEGIC COMPASS IMPLEMENTATION IN 2019

	Priorities	Related Actions
1.	Building additional capacity and industry partnerships in emerging industries and areas of government demand (such as cyber, renewables, health and education).	<ul style="list-style-type: none"> <li>Pursue market opportunities in the Governments' priority areas.</li> <li>Industry Advisory Groups – refresh CIT Industry Advisory Groups for greater industry engagement and market intelligence and link to the Board.</li> </ul>
2.	Improving the recognition of CIT as a major economic and social contributor to the ACT and region, now and into the future.	<ul style="list-style-type: none"> <li>Communication Strategy for distribution of Report titled <i>Canberra Institute of Technology: Economic and Social Contribution to the ACT</i> (February 2019).</li> <li>Successful engagement with Economic Development Sub Committee of Cabinet (April 2019).</li> </ul>
3.	<p>Enhancing contemporary organisational transformation and workforce development at CIT through ongoing investment in our people through:</p> <ul style="list-style-type: none"> <li>the overarching <i>Evolving Together Project</i> (with a greater focus on middle management and Heads of Departments);</li> <li>the <i>Product Innovation Project</i> which has successfully demonstrated the importance of collaboration and innovation across CIT.</li> </ul>	<ul style="list-style-type: none"> <li>Evolving Together Design Team supported to develop and implement a CIT platform of appropriate tools for the transformation of people, processes and systems.</li> <li>Utilise micro-narrative capture and network mapping tools to map connections and disposition levels across CIT to determine enablers and constraints and enhance organisational transformation.</li> <li>Undertake leadership and business management development for middle management and Heads of Department</li> <li>Expand the PIF program to include <ul style="list-style-type: none"> <li>the availability of basic design thinking Units of Competencies (UOCs) to all CIT staff utilising the [REDACTED] trained CIT teachers</li> <li>Partnering with industry to embed industry into the CIT [REDACTED] PIF programs to develop new products and services eg Renewable Energy Hackathon</li> </ul> </li> <li>Further leverage the alignment of the Evolving Together and Product Innovation project approaches to drive innovation, collaboration and transformation at CIT.</li> </ul>

4.	Maintaining focus on <i>Transforming our Business</i> through people, processes and system changes including fully understanding the costs of service delivery.	<ul style="list-style-type: none"> <li>• Drive continuous business improvement through transforming the delivery of corporate functions across CIT with coordination and integration with other ACT Government agencies where cost effective and efficient.</li> </ul>
5.	Driving <i>Campus Renewal</i> at Reid as part of the City East Education Renewal Precinct with [REDACTED]	<ul style="list-style-type: none"> <li>• Budget Bid development and implementation for Reid Campus Renewal.</li> <li>• Continue to implement campus renewal through ongoing support to the CIT Campus Modernisation Sub-Committee.</li> </ul>
6.	Investing in digital infrastructure including as part of CIT's Campus Renewal and in line with the Chief Minister's ambitions for Canberra.	<ul style="list-style-type: none"> <li>• Budget Bid development and implementation for new CIT ICT environment (including Desktop, Network and Application project).</li> </ul>
7.	Reshaping education and training products ( <i>Innovative Learning Resources Project</i> ) and enhancing teacher capability (including digital fluency) through the <i>Evolving Teacher Project</i> .	<ul style="list-style-type: none"> <li>• Continue development of high quality training products which have the capacity to maximise student numbers and learner satisfaction whilst reducing delivery costs.</li> <li>• Investigate and analyse potential benefits from the Banner 9 upgrade in April 2019 for improving learning resources and program delivery.</li> <li>• Continue to target support and training for teachers to address skill gaps through collaborative and innovative teaching practices.</li> <li>• Develop and implement a framework for the design and delivery of blended learning models for CIT.</li> </ul>

## CIT Evolving Together Advisory Group (ETAG) Terms of Reference as at 27 March 2018

---

### Purpose

The purpose of the Evolving Together Advisory Group (ETAG) is to provide a collaborative forum for co evolving and co designing advice to the Chief Executive Officer on the Strategic Compass Evolving Together Projects and the Strategic Compass 2020 – Evolving Together.

### Role

ETAG is the peak advisory body within CIT for providing advice and recommendations to the CIT Chief Executive Officer (CEO) on:

- the current status of the Strategic Compass Evolving Together Projects, their ongoing development and the future implementation of the Strategic Compass projects
- project interdependencies, opportunities, issues and risk management to maximise implementation of the Strategic Compass 2020 directions
- papers prepared by project managers, executive leads and other ETAG members
- progress in CIT's transformation and achievement of the Strategic Compass directions

ETAG may also provide advice on the 2018 Transforming our Business (Back of House) Project where the CEO requests such advice.

ETAG may recommend for some issues to be referred to other relevant internal committees for resolution where appropriate. This may include the CIT Executive Management Committee (EMC), IMICT Committee or the Cultural Working Group.

Note: the Campus Modernisation Project reports formally to a Campus Modernisation Cabinet Sub Committee. Consideration of campus modernisation issues within the ETAG forum is more to inform ETAG of progress where appropriate and discuss project interdependencies, opportunities and risk.

### Responsibilities

Members are expected to:

- demonstrate at all times the CIT Cultural Traits
- be open to opportunities for co-evolving approaches with other members
- participate and act in the best interests of CIT as a whole
- express opinions constructively and openly
- before each meeting contribute the time required to prepare for the meeting
- after each meeting complete agreed actions within required timeframes
- report back to line areas on progress where appropriate

### Chair

The Chair of ETAG is the Strategic Advisor to the Chief Executive Officer. The Chair will ensure that meeting agendas are appropriate and papers are provided with adequate time for members to prepare for the meetings. The Chair will encourage and support robust conversation, and allow an opportunity for further

discussion where items require more consideration. The Chair will approve the draft minutes and actions prior to circulation to members.

### **Meeting Schedule**

The Evolving Together Advisory Group will meet monthly for two hours. In support of ETAG's purpose, the Chair will meet with Project Managers as a group on an informal basis fortnightly. The Chair may also meet individually with Project Managers in a mentoring capacity to assist both Project Managers and Executive Leads.

### **Secretariat and Minutes**

Executive Assistant to the CEO. Minutes and actions will be prepared by the Secretariat.

## Membership

Members (27 March 2018)	Position
Ms Catherine Hudson	Strategic Advisor to the CEO (Chair)
Ms Leanne Cover	Chief Executive Officer Executive Lead, Evolving Together Project
Ms Paula McKenry	Executive Director, Education and Training Services Executive Lead, Evolving Teaching Project and the Innovative Learning Resources Project
Ms Anita Hargreaves	Executive Director, Corporate Services Executive Lead, Transforming our Business Processes Project
Mr Paul Ryan	Executive Director, Industry Engagement and Strategic Relations Executive Lead, Digitalisation Project, Australian Apprenticeship II Project, Business Development and Industry Partnerships Project, and Campus Modernisation Project (Centres of Excellence)
Ms Sue Maslen	General Manager, CIT Student and Academic Services
Ms Lucy Marchant	Director, CIT Pathways College
Ms Fiona Dace-Lynn	Director, CIT Technology and Design College
Ms Fiona Mitchell	Director, CIT Business, Tourism and Accounting College
Mr James Dunstan	Director, CIT Health, Community and Science College
Ms Anita Wesney	Director, CIT Trade Skills and Vocational Learning College
Ms Maria Dealy	Director, CIT Student Services
Mr Karl Caig	Director, CIT Corporate Finance and Business Support
Ms Caroline Hughes	Director, CIT Yurauna Centre
Ms Elizabeth Tomaras	Director, CIT Education Services
Ms Jayne Miller	Director, Business Development and Growth Project Manager, Product Innovation Project
Ms Jaci Ganendran	Director, Learning Services and Innovation

Ms Margaret Russell	Senior Manager, Audit and Review
Ms Angela Ryan	Project Manager, Evolving Teacher Project
Mr J-Deon Easterby-Wood	Project Manager, Innovative Learning Resources Project
Ms Alice Clements	Project Manager, Australian Apprenticeship II Project
Mr James Latimore	Project Manager, Business Development and Industry Partnerships
Ms Penny Neuendorf	Project Manager, Digitilisation Project
Mr Gerard Johnston	Senior Manager, CIT Safety and Employment Relations
Ms Bec Sporcic	Marketing Manager, CIT Business and Brand Development
Mr Jason Washington-King	Head of Department, CIT People Development
Ms Rhonda Fuzzard	Manager, CIT Student Support

NOTE: If Members are unable to attend they should organise a proxy from their area to attend where possible.

NOTE: Other staff representatives may be required to attend as advised by the Chief Executive Officer.

## **AUDIT, RISK AND FINANCE COMMITTEE**

### **MEETING NO. 18**

#### **Agenda Item 4.1.1**

### **Strategic Compass 2020 Projects – Evolving Together Lessons Learnt**

#### **Purpose**

To provide the Audit, Risk and Finance Committee (the Committee) with a report on the lessons learnt during 2017 while implementing the Strategic Compass projects.

#### **Background**

The CEO outlined the lessons learnt to the Board at the December 2017 meeting and following deliberations, the Board endorsed further investment in Strategic Compass Projects for 2018 to create 'a new CIT' for 2020 and beyond. It also endorsed a greater focus in 2018 on transforming our back of house to be 'fit for purpose' and address the identified points of friction in our 'enabling areas' within CIT.

At the Committee's March 2018 meeting a paper was tabled detailing Board directions for 2018; revised governance arrangements for 2018; and proposed reporting to the Audit, Risk and Finance Committee for 2018. The Strategic Advisor to the CEO attended the meeting and verbally outlined some of the lessons learnt.

The Committee requested a written report on lessons learnt at its March 19 2018 meeting. This paper meets the Committee's request.

#### **Issues**

Key lessons learnt during 2017 while implementing the Strategic Compass included the following:

- Our systems, processes and technology limited our transformation and need major reform.
- There are patches of limited understanding of staff (including consultants and contract staff) in key ACT Government legislative requirements and processes including for procurement (Digitalisation Project) which resulted in reprioritisation and corrective action.

- The capacity of our 'enabling services' in the Corporate Services Division held us back in Evolving Together during 2017.
- The need to strengthen our learning and development and performance management across CIT for greater alignment to the Strategic Compass objectives and outcomes.
- Governance arrangements for implementing the Strategic Compass projects need to ensure that key risks and opportunities of project managers are conveyed in a timely manner up the line for appropriate decision making.
- Bringing in private sector project management expertise had some downsides in terms of lack of knowledge of how to get things done inside CIT and ACT Government. We need to recruit people who want to learn about how to work in Government too – ie two way capacity building.
- ■ project management methodology and templates were not 'fit for purpose'.
- We need to strengthen our internal communication capacity and use every channel available to us to communicate success.
- Staff in CIT and CIT Solutions are working more collaboratively and effectively now that 12-18 months ago and importantly
- We chose the right projects for investing in and we need to continue to implement the Strategic Compass Projects for CIT's future success.

As discussed at the Committee's March 2018 meeting, as a result of the lessons learnt during 2017 many changes were implemented from the beginning of 2018, including changes to governance arrangements. A key governance change is the change from a Strategic Compass Implementation Group (SCIG) to an Evolving Together Advisory Group (ETAG) for 2018. The agreed Terms of Reference for ETAG are included as **Attachment A** for the Committee's information.

Another key change was moving from executive sponsors to executive leads when the new executive team was put in place from 22 January 2018 with the arrival of Paula McKenry as Executive Director, Education and Training Services.

Although the CEO and the Executive Team, including the Executive Director Corporate Services, have been focussed on transforming CIT's business this year, the imminent retirement of the Executive Director Corporate Services at the end of June 2018, may create a risk that momentum will not be maintained while new arrangements are put in place. An update on how the CEO is mitigating this potential risk will be provided to the Committee verbally at the June meeting.

## **Recommendation**

That the Committee note the information provided.

Cathy Hudson  
Strategic Advisor to the CEO  
24 May 2018

CIT Board Paper

Agenda Item: 5.3

Title: Strategic Compass Program progress update – November 2017

Outcome: Noting

**Recommendation:** The CIT Board note the status of the Strategic Compass Program.

<b>Issues Summary</b>	<p>Key points summarising the status of the program as at November 2017 include:</p> <ul style="list-style-type: none"><li>▪ the commencement of recruitment for key project positions;</li><li>▪ A review of the Digitalisation Strategy Project conducted by the A/g Executive Director, Education and Training Services, resulted in a shift in direction;</li><li>▪ a projected \$1.385m of unspent funding by 31 December 2017 that will be carried forward to 2018 to support ongoing project deliverables;</li><li>▪ the majority of the project and program risks have been reassessed and deemed suitable for closure while emergent risks or ongoing issues will be assessed for inclusion in the CIT Strategic Risk Profile.</li></ul>
<b>Key Risks</b>	Details provided below.
<b>Financial Implications</b>	Details provided below.
<b>Consultation</b>	Project Managers and Project Sponsors were consulted in preparing this report as required by the Governance Framework- Strategic Compass Program.

**Background/Issues**

1. The CIT *Strategic Compass 2020 - Evolving Together* was launched by the Minister and CIT Chair in July 2016, and sets CIT's new direction and priorities to the year 2020. At this time, CIT received two tranches of National Partnership Agreement funding totalling \$8.1m to support the implementation of the Strategic Compass projects until the end of 2017.

- 
2. The Strategic Compass Program commenced in January 2017, bringing together the projects detailed in the Strategic Compass (nine commitments) under a single evolving together banner of operations. This was done to enable cross project collaboration and communications, as well as overall dependency management for the combined benefit of CIT.
  3. The CEO and executive team with advice from an expanded Strategic Compass Implementation Group (SCIG), which now includes all College Directors and other CIT Directors and the Senior Manager, Audit and Risk as an observer have been considering the transition of the Strategic Compass projects to a 'new CIT' for 2018 and beyond. The projects are now in the final quarter of delivery in the first year, and project transition activities have commenced in some projects ahead of the December 2017 Christmas shutdown.

### Strategic Compass Program Status

4. Overall, the Strategic Compass projects are not being formally closed as normally would occur by implementing standard project management methodology and instead being transitioned to form part of a new CIT for 2018 and beyond. The projects have commenced these transition activities for the 2018 calendar year, which include the finalisation of approved 2017 project outcomes and the integration of project outcomes into business as usual (BAU) operations.
5. All projects are intending to carry out further activities in 2018 and have presented budget submissions for consideration by the CIT Executive. Following Board discussions on the Strategic Compass Projects at its most recent meeting, and pending the review and approval of project budget submissions, the CEO has announced the commencement of recruitment for key project positions for 2018, in order to minimise disruptions to project delivery and integration activities.
6. Key elements of the program are detailed below:
  - a) **Scope:** Major project achievements have been presented to the Board throughout the year. The scope of two projects have changed moving forward into 2018:
    - i. *Digitalisation Strategy Project*  
The review of project progress along with the completion of contracts by key consultants has resulted in a recommended shift in direction by the Executive Director, Education and Training Services. This proposed shift in direction was positively received at project presentations and discussion sessions at the CEO Forum on 2 November 2017. Following further consideration by the executive team, the CEO has approved the realignment of *the Digitalisation Strategy Project*.
    - ii. *Customer Experience Journey Project and the Evolving Together Project*  
The key planned outcomes for these projects have been achieved and deployed across the organisation, with the balance of funds identified and approved for carry forward to 2018. It is proposed that the carried forward funding will be utilised in 2018 to conduct professional development in order to further uplift customer service across the organisation. This professional development will

form part of a broader professional development and cultural change agenda under the Evolving Together Project in 2018.

- b) **Schedule:** As projects continue to transition outcomes into BAU and new activities have been identified in budget submissions for implementation in 2018, project schedules will continue to be reviewed and revised into the new year. This will result in changes to project timelines previously provided to the Board.
- c) **Financials:** An assessment of the financial progress of the projects against the approved budget was conducted in October, on end of September data, by the Program Manager and the CIT Finance team. This was in order to validate the planned expenditure (estimate to complete) for the projects until December 2017. The following table displays the final results of the financial assessment as presented to SCIG:

	\$'000	\$'000	\$'000
Item	Budget	Estimate to Complete	Variance
Evolving Together	271	191	80
Customer Experience Journey	430	375	56
Business Development & Industry Partners	313	314	-1
Innovative Learning Resources	630	524	106
Evolving Teacher Project	415	378	37
Digitalisation Strategy Project	2,250	1,532	718
Product Innovation Project	200	83	118
Transformation & Change Team	309	304	5
Australian Apprenticeship project (AA2)	3,410	3,144	267
<b>TOTALS</b>	<b>8,229</b>	<b>6,844</b>	<b>1,385</b>

7. As outlined above, there is a total underspend of \$1.385m across the program comprising \$.401m in ACT Funding Agreement (ACTFA) funding and \$.983m in Strategic Compass Funding.
8. Discussions have recently occurred with Skills Canberra regarding the desirability of carrying forward some ACT Funding Agreement (ACTFA) funding to 2018 (see table below for details of the \$0.401m funding by projects). Previously CIT was informed that any unspent ACTFA funds could not be spent after 31 December 2017. However, Skills Canberra has now agreed to ACTFA funding of \$0.401m being carried forward to 2018 and the CEO has now co-signed the related ACTFA schedule with the Director, Skills Canberra.
9. **Risk:** As projects are being transitioned, inactive risks have been closed and any outstanding risks will be provided to the CIT Audit and Risk team for consideration for inclusion in the CIT risk register.

**CIT Board Paper**

---

**Agenda Item:** 4.2

**Title:** Strategic Compass Projects - Consolidated Model for 2018-2020

**Outcome:** Discussion

---

**The CIT Board notes:**

- (1) The development of a consolidated model detailing the potential benefits and costs of the Strategic Compass projects;
- (2) The links between this work and progress on implementing the Enterprise Employment strategy and restructuring within CIT;
- (3) That further analysis is required before the December 2017 Board meeting, to determine the likely realisation of the benefits for 2018-2020, and to inform the Board's decisions regarding the 2018 CIT Budget; and
- (4) The CEO with advice from the Executive Team will mitigate the risk of losing key project and program staff during the last quarter of 2017 on a case by case basis.

<b>Issues Summary</b>	<p>CIT received \$8.1 million in funding to support the implementation of the Strategic Compass projects until the end of 2017.</p> <p>The CIT Chief Executive Officer (CEO) and executive team with advice from the Strategic Compass Implementation Group (SCIG) have been considering the transition of the Strategic Compass projects to a new CIT for 2018 and beyond.</p> <p>This paper presents for the Board's discussion a consolidated view of the potential impact on CIT if all project transition plans are approved at the 'recommended' option level. This is compared to a 'do nothing status quo' model. There are many variations to the recommended or status quo models, in that every project has a range of possible options for transforming into business as usual. Many of the potential revenue earning projects include assumptions based on the enabling or supporting projects being funded at the recommended level. Hence the need to view the benefits within a consolidated model. The consolidated model also currently assumes significant efficiencies can be gained through the successful</p>
-----------------------	---

	implementation of our Enterprise Agreement Strategy.
<b>Key Risks</b>	<p>One of the major risks for successful project transition to the new CIT for 2018 and beyond is the potential to lose key project staff. Other risks include completing the expected project deliverables in line with the financial requirements of the funding, managing staff consultation to transition to a new CIT during an enterprise bargaining period, and while on boarding a new executive team.</p>
<b>Financial Implications</b>	<p>Funding for the Strategic Compass projects was received in two tranches. The first tranche of funding is linked to CIT's ACT Funding Agreement (ACTFA) and must be acquitted by 31 December 2017. The second tranche of funding has some flexibility for expenditure to occur in the first half of 2018.</p> <p>The paper outlines an estimated combined impact of implementing all projects' recommended options in the 2018 year is a net financial (cash) impact of a positive \$1.328m.</p> <p>This compares to the 'do nothing' or 'status quo' model with an estimated net impact of this approach is negative \$3.473m, with the risk of also losing an addition \$7.0m of profile funding.</p> <p>The nett result is defined as the total benefits, including retaining the at risk profile revenue of \$7.0m, less the new expenses (includes new capital). The Nett result difference between recommended and do nothing in 2018 is \$15.056m. Over the 3 future years that difference becomes a cumulative \$60.055m</p> <p>Further detailed analysis of the likely realisation of benefits and costs of implementation will be undertaken for consideration at the December 2017 Board meeting.</p> <p>It is important to note that funding for campus modernisation including digital infrastructure will be considered separately as part of Cabinet's consideration of the Campus Modernisation Sub-committee's work and as part of the Board's decision to allocate \$5m of cash reserves to information technology.</p>
<b>Consultation</b>	<p>Some transition arrangements will require structural change to existing teams within CIT. This will require consultation with unions and staff in line with enterprise agreement requirements. Some consultation has already occurred (e.g. for the Australian Apprenticeship Project).</p>

## Background/Issues

1. Every project has detailed project management reports such as project approaches; benefit realisation plans and budget submissions, which provide detail of the projects. This paper provides an overview, at a strategic level, of what is required by each project to the consolidated view of the benefit to a new CIT.
2. The most important aspect of a new CIT realising all of these potential benefits is our people. People are at the forefront of organisational change management and to ensure our people are consulted, informed, contribute and are engaged, investment in the ***Evolving Together Project*** needs to continue for a number of years (at least until 2020) to ensure people remain at the front of implementing the Compass outcomes and remain champions of CIT. Early statistics from our recent staff survey indicate areas of positive impact and opportunities for further engagement with CIT staff in our transformation journey. The survey returned the highest ever response rate to a CIT staff survey with 522 responses (or 59%). Over 1,200 answers were entered across three open text questions, far more than in previous surveys. Directors and managers have access to the reporting of their respective Colleges and Divisions and a whole of CIT response strategy is being developed.
3. A core component of the transformation at CIT is the ***Centres of Excellence Project*** and the resulting campus modernisation. The consolidated model requires contemporary physical and digital spaces for learning, management and administration with a footprint that is learner centric, financially affordable and 'fit for purpose'. Long-term success of the consolidated model is dependent to some extent on the outcomes from Cabinet's deliberations on the work of the Campus Modernisation Sub Committee. Reduced ongoing maintenance costs will increase CIT's financial sustainability.
4. Being wholeheartedly client focussed requires the deliverable of the ***CIT Customer Experience Journey Project***, which has already delivered a range of effective reports to capture the current state and describe changes required to deliver greater client experience. Our ongoing success requires this to become part of CIT permanently.
5. A more immediate requirement is for learning to be delivered in a more flexible, innovative, responsive and industry led way. This underlines the complex relationships of the projects. For this to occur in 2018, CIT will need the ability to efficiently build blended learning resources, which are hosted within a contemporary 'digital campus'. To achieve this the ***Digitalisation Strategy Project*** needs to deliver new systems such as a functional Client Relationship Management (CRM), a fully on line enrolment system, and modern Learning Management System (LMS) as well as streamlined systems and processes to enable new products developed by the ***Innovative Learning Resources Project*** to work. These are interdependent as the system without new product is not

useful and new product without a new system is redundant. New ideas can emerge under this framework with ideas coming from the **Product Innovation Fund**.

6. Underpinned by these learning product initiatives is the **Evolving Teacher Project**. Face to face teaching will underpin much of CIT's future success, but this needs to significantly evolve from the current practice. It needs to be work integrated, have access to genuine online content and be supported by a modern digital campus or LMS. The deliverable of the Evolving Teacher Project will enhance our teaching workforce to deliver the new products on the new technology, in new physical spaces provided by campus modernisation or integrated at workplaces.
7. The 'front end' of the network of these projects is the revenue raising projects. The **Australian Apprenticeship Project** acknowledges that the current regulatory framework for compliance in this space has changed dramatically over recent years. Without investment in this project CIT would lose money through the application of non-compliance rates and also not be competitive for new funding as the funding body (Skills Canberra), employers and students would lose confidence in CIT to manage this important sector in the VET training marketplace.
8. The **Business Development and Industry Partnerships Project** (BDIP) is the shop front of the new CIT. By itself it really has no base for investment, but when it is the face of the combined improvements of all the other projects it realises the combined revenue benefits of all the projects for a small investment of 5 people. For example, the BDIP team have the ability to promote new products to industry, develop relationships with industry and increase collaboration across CIT and with employers to ensure CIT programs are responsive and market ready, resulting from benefits realised by the other projects, although it would be limited based on the following:
  - Without approval of the Australian Apprenticeship Project, the BDIP Unit would have limited ability to win new Skilled Capital and User Choice funding for CIT, with no mechanism to support compliance and ongoing monitoring
  - Colleges could not sustain the ongoing capacity to resource the training with a new product design, without the ongoing support of the Evolving Teacher Project
  - Ongoing increase in nominal hours would not be possible if enrolments would continue via a paper based mechanism rather than online format based on initial negative feedback from external stakeholders
  - New work would not become repeat business without the increase in client experience.

### **Net Financial Effect of Projects**

9. The combined impact of all projects into a consolidated model for the 2018 year is a net financial (cash) impact\* of \$1.328m. This is comprised of:
  - Increased new revenue of \$4.021m

- 
- Retained revenue\*\* of \$8.955m
  - Total efficiencies of \$3.091m
  - Net new expenses of \$5.784m
  - New capital spend of \$1.74m

\* note; the 'cash' impact is the increase in revenue, plus the efficiency savings, less the new expenses.

\*\* note; the retained revenue is not included in the 2018 cash impact, however it genuinely is a benefit given that under the status quo model it will be lost or forgone revenue.

10. This compares to the 'do nothing – status quo' model. This model is the position CIT would be in if the projects did not produce any tangible benefits going into 2018, or that CIT could not fund these in 2018 to deliver the benefits. This model is effectively the operating position of CIT if key components from the projects are not funded. The net impact of this approach is negative \$3.473m, with the risk of also losing an addition \$7.0m of profile funding. This is comprised of:

- Decrease in revenue of \$2.448m
- Loss of retained revenue (loss of profile funding) of \$7.0m
- Decreased efficiencies of \$0.175m
- Net new expenses of \$0.850m
- No new capital

11. Please see the Strategic Compass 2020 Projects Summary Analysis in Attachment A, noting that this currently includes efficiencies to be gained through the successful implementation of the Enterprise Agreement strategy.

12. As mentioned above, there are options between these two models with individual project plans showing a range of options, but as discussed above, these become very co-dependent and to achieve the true consolidated model, a bundled approach to transitioning the projects to the new CIT is needed. Further refinement of the likely realisation of the benefits and costs will be undertaken for the Board's consideration at the December 2017 Board meeting.

CIT Board Paper

---

<b>Agenda Item:</b>	<b>4.2</b>
<b>Title:</b>	<b>Strategic Compass - Program Dashboard</b>
<b>Outcome:</b>	<b>Noting and feedback</b>

---

**Recommendation:** The CIT Board note the current status of the Strategic Compass Program, and provide feedback on the presentation and content of the current dashboard to enable ongoing improvements.

<b>Issues Summary</b>	Refer dashboard
<b>Key Risks</b>	Refer dashboard
<b>Financial Implications</b>	Refer dashboard
<b>Consultation</b>	The following have been consulted in developing the proposed project dashboard: CIT Executive, Project Sponsors, Project Managers and Key Stakeholders

**Background**

The CIT Strategic Compass 2020 – Evolving Together includes nine new commitments, which includes flagship initiatives that the CIT Board, the Business Development and Cultural Change Sub-committee and CIT began developing last year. The launch of the Strategic Compass 2020 in July 2016 provided an opportunity to announce the new commitments and the associated funding to build momentum around CIT’s future directions.

█ was contracted to conduct a review of the current state of the Project Management capability of CIT, to be able to deliver the initiatives above. This review identified gaps in the current capability and subsequently introduced a suite of Project Management tools to uplift CIT’s capability.

In addition, the review also recommended the establishment of a Program Manager role and a Program Management Office (PMO) function. Subsequently, the Strategic Compass Program Manager was recruited and commenced on 16 January 2017.

■ was retained until the end of February, to support the on boarding of the Program Manager and continue to build ongoing capability across CIT in Strategic Planning and Benefits Management.

### Program Management Implementation

On commencement, the Program Manager conducted a rapid assessment to identify the Program and Project management implementation successes to date and subsequent gaps requiring attention. This assessment also included developing a structured methodology for the integration of Program and Project Management into the ongoing operations at CIT over the next twelve months. The proposed approach for integration is outlined below

### Assessment

The findings from the assessment are outlined below:

1. **Program Governance:** There is a lack of clear delineation between existing organisational structures and program governance structures. This could impact the ongoing oversight of the program, by focusing on business as usual activities as opposed to program matters. De-prioritisation of program matters results in scheduling delays and cost overruns.
2. **Project Documentation:** Projects are currently at various stages of completing the project documentation previously implemented. This may delay commencement or impact delivery if not addressed as a priority
3. **Program Financial and Procurement:** Current arrangements do not differentiate between ongoing operational delegation and program financial delegation. This has the potential to create situations in which approvals are carried out within operational delegation, without consideration for the broader impact on the organisation

4. **Program reporting:** There is a lack of clarity on the current progress and financial status of projects. This is compounded by the need to continue to standardise templates used across projects
5. **Program overview and scheduling:** There is the absence of an overarching program schedule, which could result in issues in tracking dependencies between projects
6. **PMO tools:** current PMO tools are comprehensive, but require further tailoring to suit the operating environment at CIT and as well as alignment with existing frameworks (for example Risk Management)

### Proposed Resolutions

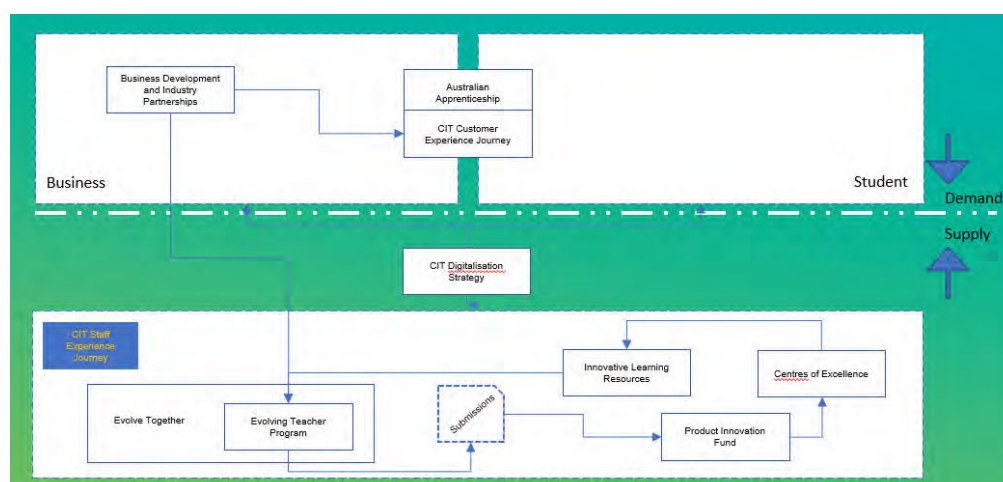

On finalisation of the assessment, the following resolutions were proposed and accepted by the CIT Executive. These are currently being implemented and are expected to continue to uplift internal capability.

Issue #	Issue	Resolution
1	Program Governance	<ul style="list-style-type: none"> <li>- Establish Implementation Group</li> <li>- Develop program financial delegations, that different business as usual executive roles from Project sponsor roles</li> </ul>
2	Project Documentation	<ul style="list-style-type: none"> <li>- Ensure that all project documentation are completed</li> </ul>
3	Program Financial and Procurement	<ul style="list-style-type: none"> <li>- Develop program guidelines/ procedures for financial and procurement management</li> <li>- Document project financial planning and reporting cycles and templates</li> </ul>
4	Program reporting	<ul style="list-style-type: none"> <li>- Standardise and streamline program and project reporting</li> <li>- Ensure that projects are tracking to agreed schedule</li> <li>- Develop dashboard reporting (including financial) scaled for target group (e.g. Board, Executive)</li> </ul>
5	Program overview and scheduling	<ul style="list-style-type: none"> <li>- Document program overview and schedule</li> </ul>
6	PMO tools	<ul style="list-style-type: none"> <li>- Assess the PMO tools for scalability</li> <li>- Implement centralised repository for PMO tools to enable ease of access</li> </ul>

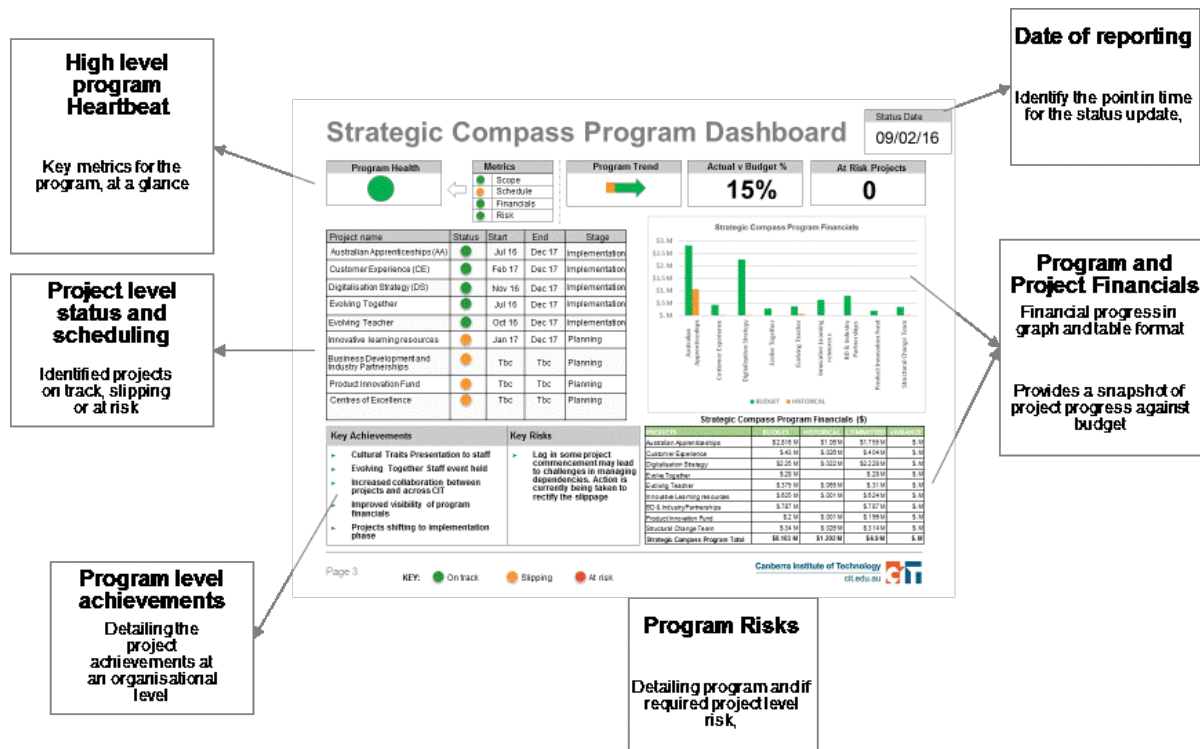

### Additional Information

Provided below are additional artefacts developed as part of the ongoing implementation.

1. **Program Mind map:** As part of the implementation, an initial map (displayed below) has been developed to identify the potential linkages and dependencies across the program. This map will evolve as projects mature.

2. **Program Dashboard:** The existing program dashboard has been revised to facilitate strategic oversight and decision making. The revised version is attached for noting and feedback. It is expected that the functionality of the dashboard and the metrics used will continue to mature as program management is integrated deeper into CIT's capability. A user guide has also been provided below.

As additional tools emerge, the recurring program status update will continue to provide the CIT Board with further insights. This will be done in order to continue to build confidence from a Board perspective, through exposure to the underlying rigor with which the program is being managed.

**CIT Board Paper**

**Agenda Item:** 4.2

**Title:** Strategic Compass – Evolving Together Projects

**Outcome:** Noting

**Recommendations:** CIT Board note the presentation of three Strategic Compass Evolving Together Projects.

<b>Issues Summary</b>	An update is being provided on three of the Strategic Compass Evolving Together projects.
<b>Key Risks</b>	Nil
<b>Financial Implications</b>	Nil
<b>Consultation</b>	Nil

**Background**

Work is continuing on the Strategic Compass Evolving Together Projects. An update on the following three projects will be presented to the CIT Board members:

1. CIT Digitalisation Strategy by Ms Sue Maslen, General Manager, CIT Student and Academic Services and Ms Sarah Dixon, Director, CIT Digital Transformation Unit.
2. CIT Customer Experience Journey by Ms Sue Maslen, General Manager, CIT Student and Academic Services and Ms Sarah Dixon, Director, CIT Digital Transformation Unit.
3. CIT Innovative Learning Resources Project by Mr J-Deon Easterby-Wood, Learning Design Specialist.
