Aboriginal and Torres Strait Islander Library and Information Resources Network Protocols

The Canberra Institute of Technology (CIT) has adopted the Aboriginal and Torres Strait Islander Library and Information Resources Network Protocols.

We will be guided by these protocols to enable good practice by CIT in appropriate interaction with Aboriginal and Torres Strait Islander peoples in the communities which CIT serves, and in handling materials with Aboriginal and Torres Strait Islander content.

We will acknowledge and address issues relating to access to libraries, archives and information resources by Aboriginal and Torres Strait Islander peoples.

We will ensure the involvement and the participation of Aboriginal and Torres Strait Islander peoples in the governance and operation of libraries, archives and information services.

We will work towards addressing appropriate representation of Aboriginal and Torres Strait Islander peoples and their cultures in libraries, archives and information services.

Adopted July 2009
