

Scholarship Application Guidelines

1. Introduction

Delivered as part of the Cyber5050 program initiatives, CIT will select 30 participants to receive a fully funded Certificate IV in Cyber Security scholarship. This scholarship entitles the participants to one year's full-time study. Should any unit not be completed, the additional study is to be completed at the cost of the individual student.

2. Student Eligibility Criteria

To be eligible for the Course scholarship, applicants must first successfully complete CyberCX's Cyber Fundamentals micro credential training under the Cyber5050 program ([CyberCX Cyber 50:50 | Driving Gender Equality in Tech](#)) then apply for our Course.

Our Certificate IV in Cyber Security can be completed virtually by students across Australia. Students can also seek to complete the course in-person on CIT's Woden campus, or through a hybrid learning model (a combination of both virtual and in-person).

3. Selection Criteria

Applications will be assessed based on:

- **Personal Statement:** A statement about why you should be chosen for the scholarship.
-

4. Selection Process

- **Step 1:** Submission of completed application form and supporting documents by the deadline.
 - **Step 2:** Initial eligibility screening by the scholarship panel.
 - **Step 3:** Applications will review the personal statement for quality, clarity, and alignment with scholarship goals, then scored.
 - **Step 4:** Final decision and notification to successful applicants.
-

5. Availability

- **Number of Scholarships:** 30
 - **CyberCX Cohort 1** – 8 Scholarships
 - **CyberCX Cohort 2** – 7 Scholarships

- **CyberCX Cohort 3** – 8 Scholarships
